Dear Ms Grohs

Re: 2004/5141

I enclose the following information and ask that the European Commission reopen case no 2004/5141 Port of Tyne Dredging Trial as the licence conditions are not being met.

Furthermore the sand capping material is not staying in place while the amount we are being told has been dumped is incorrect.

I believe this is now a very dangerous situation yet the UK Authorities are presenting it as a success.

Please would you acknowledge receipt of this e-mail.

Bob Latimer
