Phase 7 - Disseminate

Phase	Disseminate				
Metadata object	7.1 Update output systems	7.2 Produce dissemination products	7.3 Manage release of dissemination products	7.4 Promote dissemination products	7.5 Manage user support
User needs					
Survey metadata	Update	Reuse			Reuse
Survey objectives					
Legal framework					
Statistical outputs	Update	Reuse			Reuse
Quality measures for statistical outputs	Update	Reuse			Reuse
Documentation		Create			
ESMS		Create			
ESQR		Create			
Concepts	Update	Reuse			Reuse
Data Sources	Update	Reuse			Reuse
Variables (Observation)	Update	Reuse			Reuse
Variables (Derived)	Update	Reuse			Reuse
Statistical aggregates	Update	Reuse			Reuse
Statistical units	Update	Reuse			Reuse
Classifications/Code lists	Update	Reuse			Reuse
Data collection methods	Update	Reuse			Reuse
Questionnaire		Reuse			Reuse
Questions		Reuse			Reuse
Flow logic		Reuse			Reuse
Response templates		Reuse			Reuse
Interviewer instructions		Reuse			Reuse
Target population	Update	Reuse			Reuse
Register (Universe)	Update	Reuse			Reuse
Sampling frame	Update	Reuse			Reuse
Sampling method	Update	Reuse			Reuse
Processing methodology	Update	Reuse			Reuse
Data protecton requirements	Update	Reuse			Reuse
Validation rules	Update	Reuse			Reuse
Imputation method	Update	Reuse			Reuse
Weighting method	Update	Reuse			Reuse
Disclosure control rules	Update	Reuse			Reuse
Operational processes	Update				
Respons rates		Reuse			Reuse
Imputation rates		Reuse			Reuse
Weights					
Coefficients of variation		Reuse			Reuse

For the dissemination all the metadata are stored in the metadata bases, if not yet, and reused to allow users understand the data they are using.
In these phase some specific and harmonized documents are produced and disseminated also with the data.
