Mr. Steven Capell

Director, GoSource Pty, Australia

Steven Capell is an Enterprise Architect at the Australian Government Department of Home Affairs. He also runs a boutique software development business that provides digital transformation services, specialising in cloud and microservice architectures. Steven was chair of UN/CEFACT architecture working group for a few years around 2005 and, after a 10 year gap, has returned to UN/CEFACT because he sees enormous value in the application of UN/CEFACT semantic standards to the world of Blockchains, SaaS platforms, and the Internet of Things.
