EURASIAN ECONOMIC COMMISSION

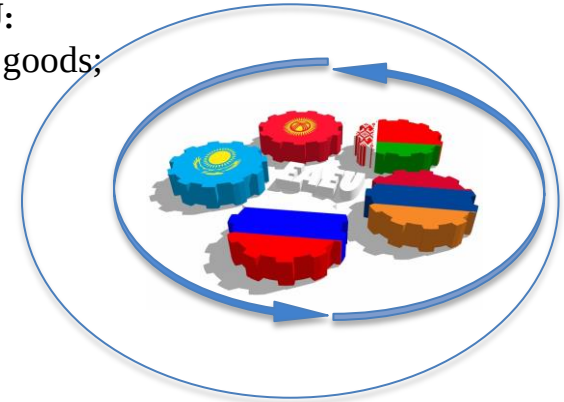
State control (surveillance) over compliance with requirements of EAEU technical regulations

Arman Shakkaliyev,
Director of Department for Technical Regulation and Accreditation,
Eurasian Economic Commission

Treaty on the Eurasian Economic Union of May 29, 2014 launched single market of safe products

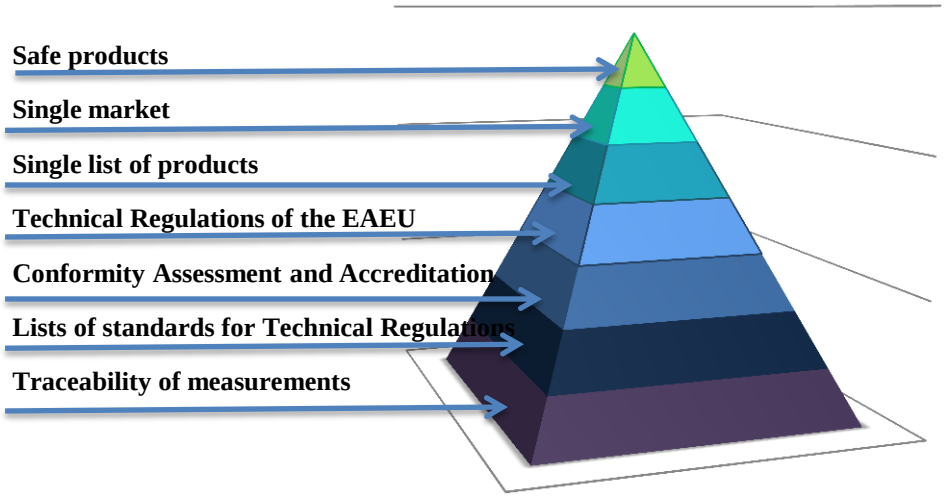
4 freedoms are implemented within the EAEU:

- Movement of goods;
- services;
- capital;
- people



Technical Regulation is the basis of safety of products at all stages of the life cycle

Structured system of interrelated elements



Products circulated on the Union's market should be safe.

- *Ensuring safety of products, circulated within the EAEU, through the application of common technical regulations;*
- *Protection of human life and health, animals and plants, environmental protection, energy efficiency and resource conservation.*

Mandatory requirements for products within the EAEU

(Chapter X, Annexes 9, 10, 11)

MANDATORY REQUIREMENTS FOR PRODUCTS WITHIN THE EURASIAN ECONOMIC UNION ARE ESTABLISHED:

by the common technical regulations

by the national legislation, before common technical regulations come into force

35 EAEU TRs adopted
35 EAEU TRs enforced

Lists of standards for 33 EAEU TRs

Include more than 11000 ðdocuments

21 EAEU TRs under development

Food products;
Products for children and adolescents;
Low voltage equipment;
Machines and equipment;
Agricultural and forestry tractors and trailers;
Wheeled vehicles etc.

Mandatory national requirements:

1) apply only in part established by transitional provisions after the Customs Union TRs are enforced

2) not applied for the release on the market, conformity assessment and market surveillance over compliance with the requirements of Customs Union TRs, after transition period is finished

APPLY ONLY TO PRODUCTS IN THE SINGLE LIST

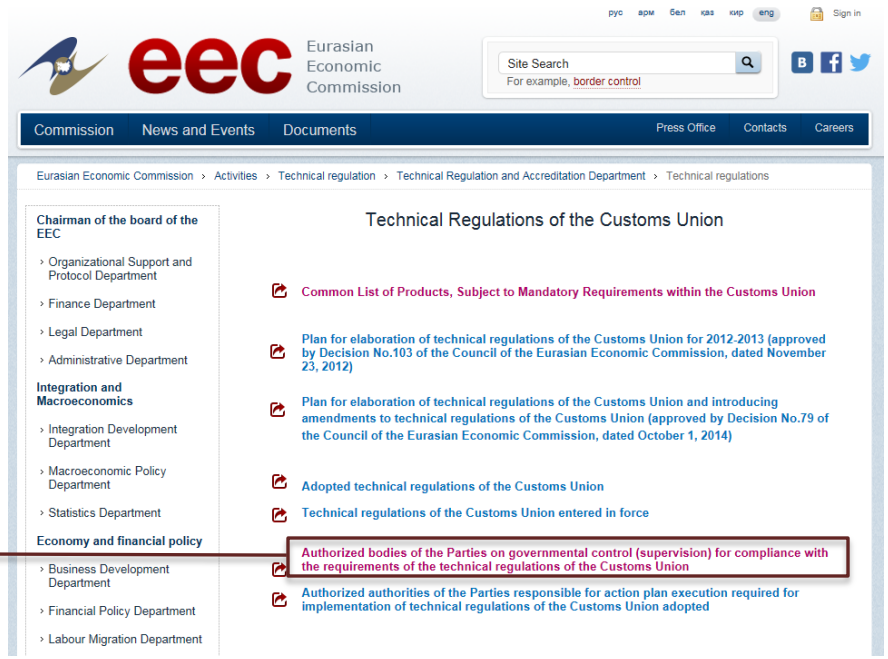
EEU Council Decision of November 23, 2012 №102

State control (surveillance) over compliance with the mandatory requirements

Treaty on the Eurasian Economic Union (Chapter X, art. 53, p. 4)

State control (surveillance) over compliance with the requirements of the Union's technical regulations is carried out in accordance with the laws of the Member States (Article 53, p.4)

Information about the authorized bodies responsible for the control (surveillance) in the EAEU is posted on the official website of the Eurasian Economic Commission www.eurasiancommission.org



Principles and approaches to harmonization of legislation of EAEU Member States in the sphere of state control (surveillance) over compliance with the Union's technical regulations are set by the international treaty within the Union.

Draft of the international treaty

Under development by the Republic of Armenia

On principles and approaches to harmonization of legislation of the EAEU Member States in the sphere of state control (surveillance) over compliance with the requirements of the Union's technical regulations

Fulfilling functions of control (surveillance) over compliance with the requirements of EAEU technical regulations is done on the basis of common approaches and rules applied by Member States

The control is carried out by authorized bodies of the EAEU Member States for products released for circulation and being circulated in the territory of the EAEU products and related processes

Implementation of a risk-based approach in carrying out state control (surveillance)

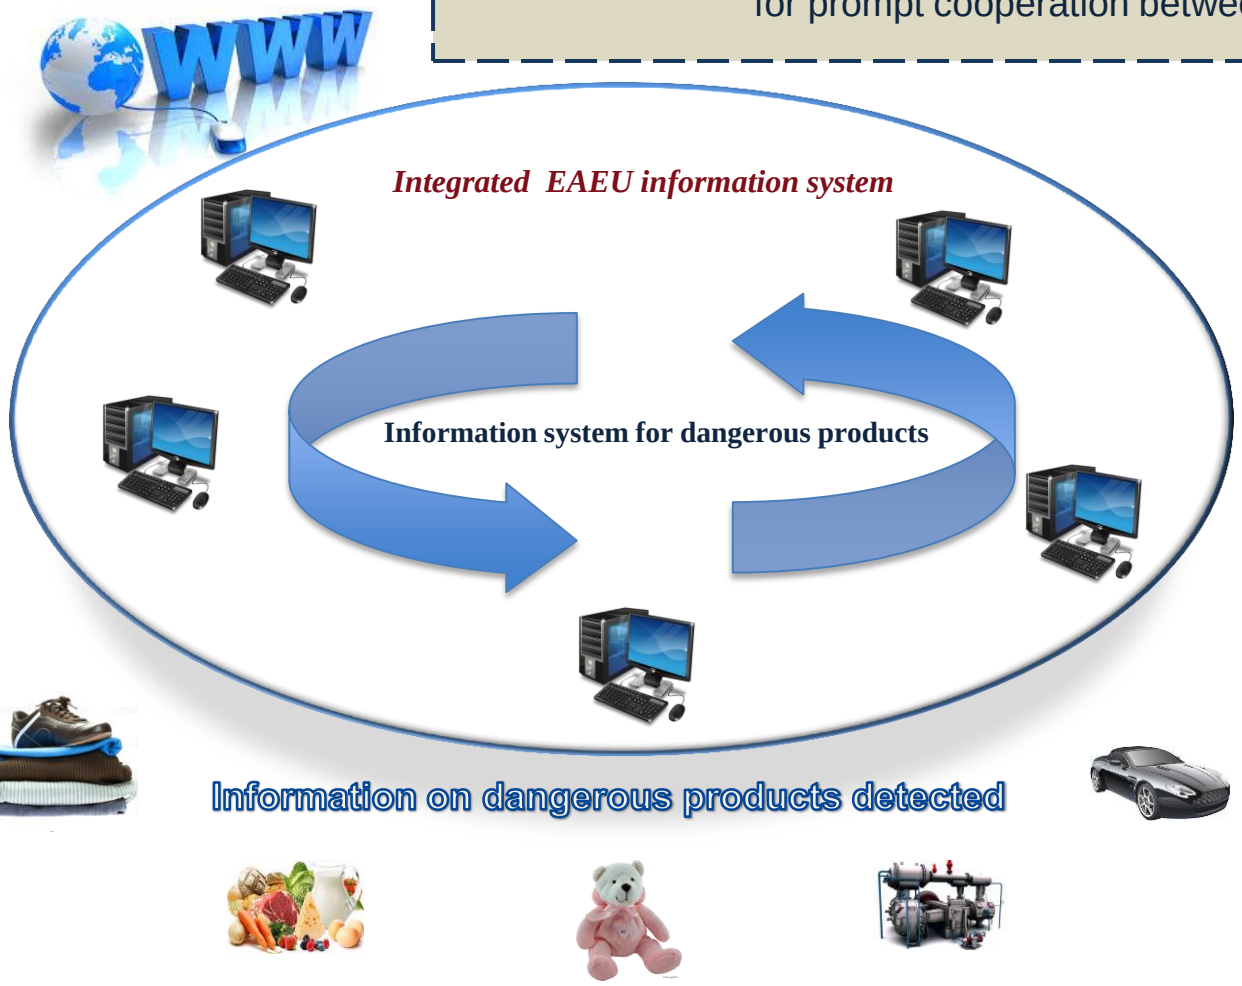
Prevention of offences over penalties is the priority

Creation of information system for dangerous products within the Union's integrated information system

Increasing the safety of circulated products and effectiveness of control (surveillance) by applying in the EAEU Member States of equivalent approaches on the basis of international best practices

Information system for dangerous products

Creation of the information system
for prompt cooperation between state bodies.



Information interchange:

- on the results of state control (supervision) activities carried out in Member States;
- on the identified products that don't meet the requirements of technical regulations of the Union (Customs Union);
- on the measures taken to prevent, detect and combat the circulation of dangerous products and (or) eliminate the negative consequences of violations;
- about cases when products subject to mandatory conformity assessment, are detected without proper documents or without information on accomplished assessment procedures, are sold in the territory of a Member State;
- on identified violations of requirements of the Union's technical regulations.

Increasing the safety of circulated products by development of information interchange

State control and marketing surveillance development

Harmonization of functions of the national state control (market surveillance) bodies

Effectiveness of the state control (market surveillance)

Equivalent requirements for state control (market surveillance), as well as the procedures of state control (market surveillance), depending on the type of product and stages of its life cycle

Unified procedures and involvement of experts and expert organizations in the activities of state control (market surveillance) as well as the qualification requirements for experts and expert organizations

Criteria for evaluation of the concept of "dangerous products", "products with high, medium and low risk", the damage caused by violation of the established requirements»

Equivalent liability for violation of mandatory requirements for products, violation of rules and conformity assessment procedures
