www.unece.org/index.php?id=32036

This Conference will be an integrated policy-oriented event which will address several thematic areas of the programme of work of the UNECE Committee on Economic Cooperation and Integration, including innovation and competitiveness policies, entrepreneurship and financing for innovative development.

The Conference will provide a platform for knowledge sharing and discussion of policies and good practices on how government policy can promote innovation by creating a better environment for entrepreneurship and facilitating the access of entrepreneurs to relevant knowledge, skills and resources. The event will create opportunities for networking among a wide range of stakeholders. The discussions will also involve learning components, thus making a direct contribution to capacity-building.
