

Pears

1. Not perfect shape for Extra Class, but is typical shape for Class I – Class I.

Pears

2. Skin defect of less than 1 cm² – Class I.

Pears

3. Slightly pigmentation due the sun – Class I. In the case that each fruit in one package is showing the same pigmentation then it's class Extra.

Pears

4. Slightly misshapen - Class I.

Pears

5. Skin defects (not open) borderline Class II.

Pears

6. Skin defect of more than 1 cm² – Class II.

Pears

7. Slight sunburn and skin defect – Class II.

Pears

8. Misshapen for variety – Class II.

Pears

9. Slight scab – borderline Class I.

Pears

10. Heavy skin defect caused by insect – Out of Grade.

Pears

11. Stalk is not intact – Class I. (fruit flesh is not damaged)

Pears

12. Near the calyx slightly misshapen - Class I.

Pears

13. Skin defect - Class I.

Pears

14. Slight russetting - Class I.

Pears

15. Skin defects, shed damage (healed, wind causes fruit to rub against tree branches) - Class II.

Pears

16. Shed damage - Class II.

Pears

17. Perfect – Extra Class

Pears

18. Skin defect > than 2,5 cm² shed damage and handling damage - Out of Grade

Pears

19. Damaged caused by insects (caterpillar) - Out of Grade.

Pears

20. Open damage (handling, fruit is mostly damaged through the stalk of an other pear) - Out of Grade.

Pears

21. Slight pigment – Class I (Color is not sufficiently uniform for Extra Class).

Pears

22. Very slight russeting - Class I.

Pears

23. Slight russeting and very slight skin defect - Class I.

Pears

24. Skin defect (cold damage) $> 2,5 \text{ cm}^2$ and $>$ than 4 cm length; scab $> 1 \text{ cm}^2$
- Out of Grade.

Pears

25. Skin defect (heavy russeting) - Out of Grade

Pears

26. Skin defect shed damage (not open) - borderline Class II (fruit was enclosed by two branches)

Pears
