

Examples of questions for Module 00, General

The first module of questions for checking a recreational boater's theoretical knowledge of CEVNI sufficient for issuing the International Certificate for Operators of Pleasure Craft (ICC), as proposed in IWG_RN/2019/5, is intended to check the understanding of the role, status and application scope of CEVNI. Information can be found in resolution No. 24, CEVNI Status document (ECE/TRANS/SC.3/2017/6) and some other UNECE publications and documents, but it is not explicitly given in CEVNI provisions. However, candidates must understand the status and application scope of CEVNI, which revision of CEVNI is applied and where it can be found. Some websites still contain references to the fourth and even third revision of CEVNI.

Furthermore, this module could include questions for checking the understanding of the existing differences between CEVNI and some regional, national and local provisions and the limits of its applicability. For this purpose, some general questions can be proposed ; the Group may agree that applicants must understand that deviations may occur between CEVNI and regional and national rules, and where this information can be found.

Examples of questions that could be included in Module 00 « General » are given below.

General

Examination objective 1: Testing of the knowledge of CEVNI status and application scope, the revision in force, where to find the official text of CEVNI and the implementation of CEVNI

<i>Number</i>	<i>Source</i>
05 00 00	<i>Purpose and scope of CEVNI</i>
	What is the abbreviation for the European Code for Inland Waterways?
	What is the full title of CEVNI?
	Which body approves and maintains CEVNI?
	What is the geographical scope of application of CEVNI?
	Which revision of CEVNI is currently in force?
	What is the status of CEVNI?
	How is CEVNI brought into force?
	What are the geographical limits of applicability of the CEVNI marking system?
	What are official languages of CEVNI?
	Where the valid authentic text of CEVNI can be found?

Examination objective 2: Testing of understanding that regional and national variations may occur and where to get information

05 00 01

Regional and national special requirements

Why the knowledge of regional and national special requirements, in addition to CEVNI, is required for pleasure boaters on inland waterways?

Where a general information on regional and national special requirements deviating from CEVNI can be found?

Where a detailed information on regional and national special requirements deviating from CEVNI can be found?

In what European countries recreational boaters must be aware of specific rules applicable to pleasure craft?
