Extended Migration Profile of RM

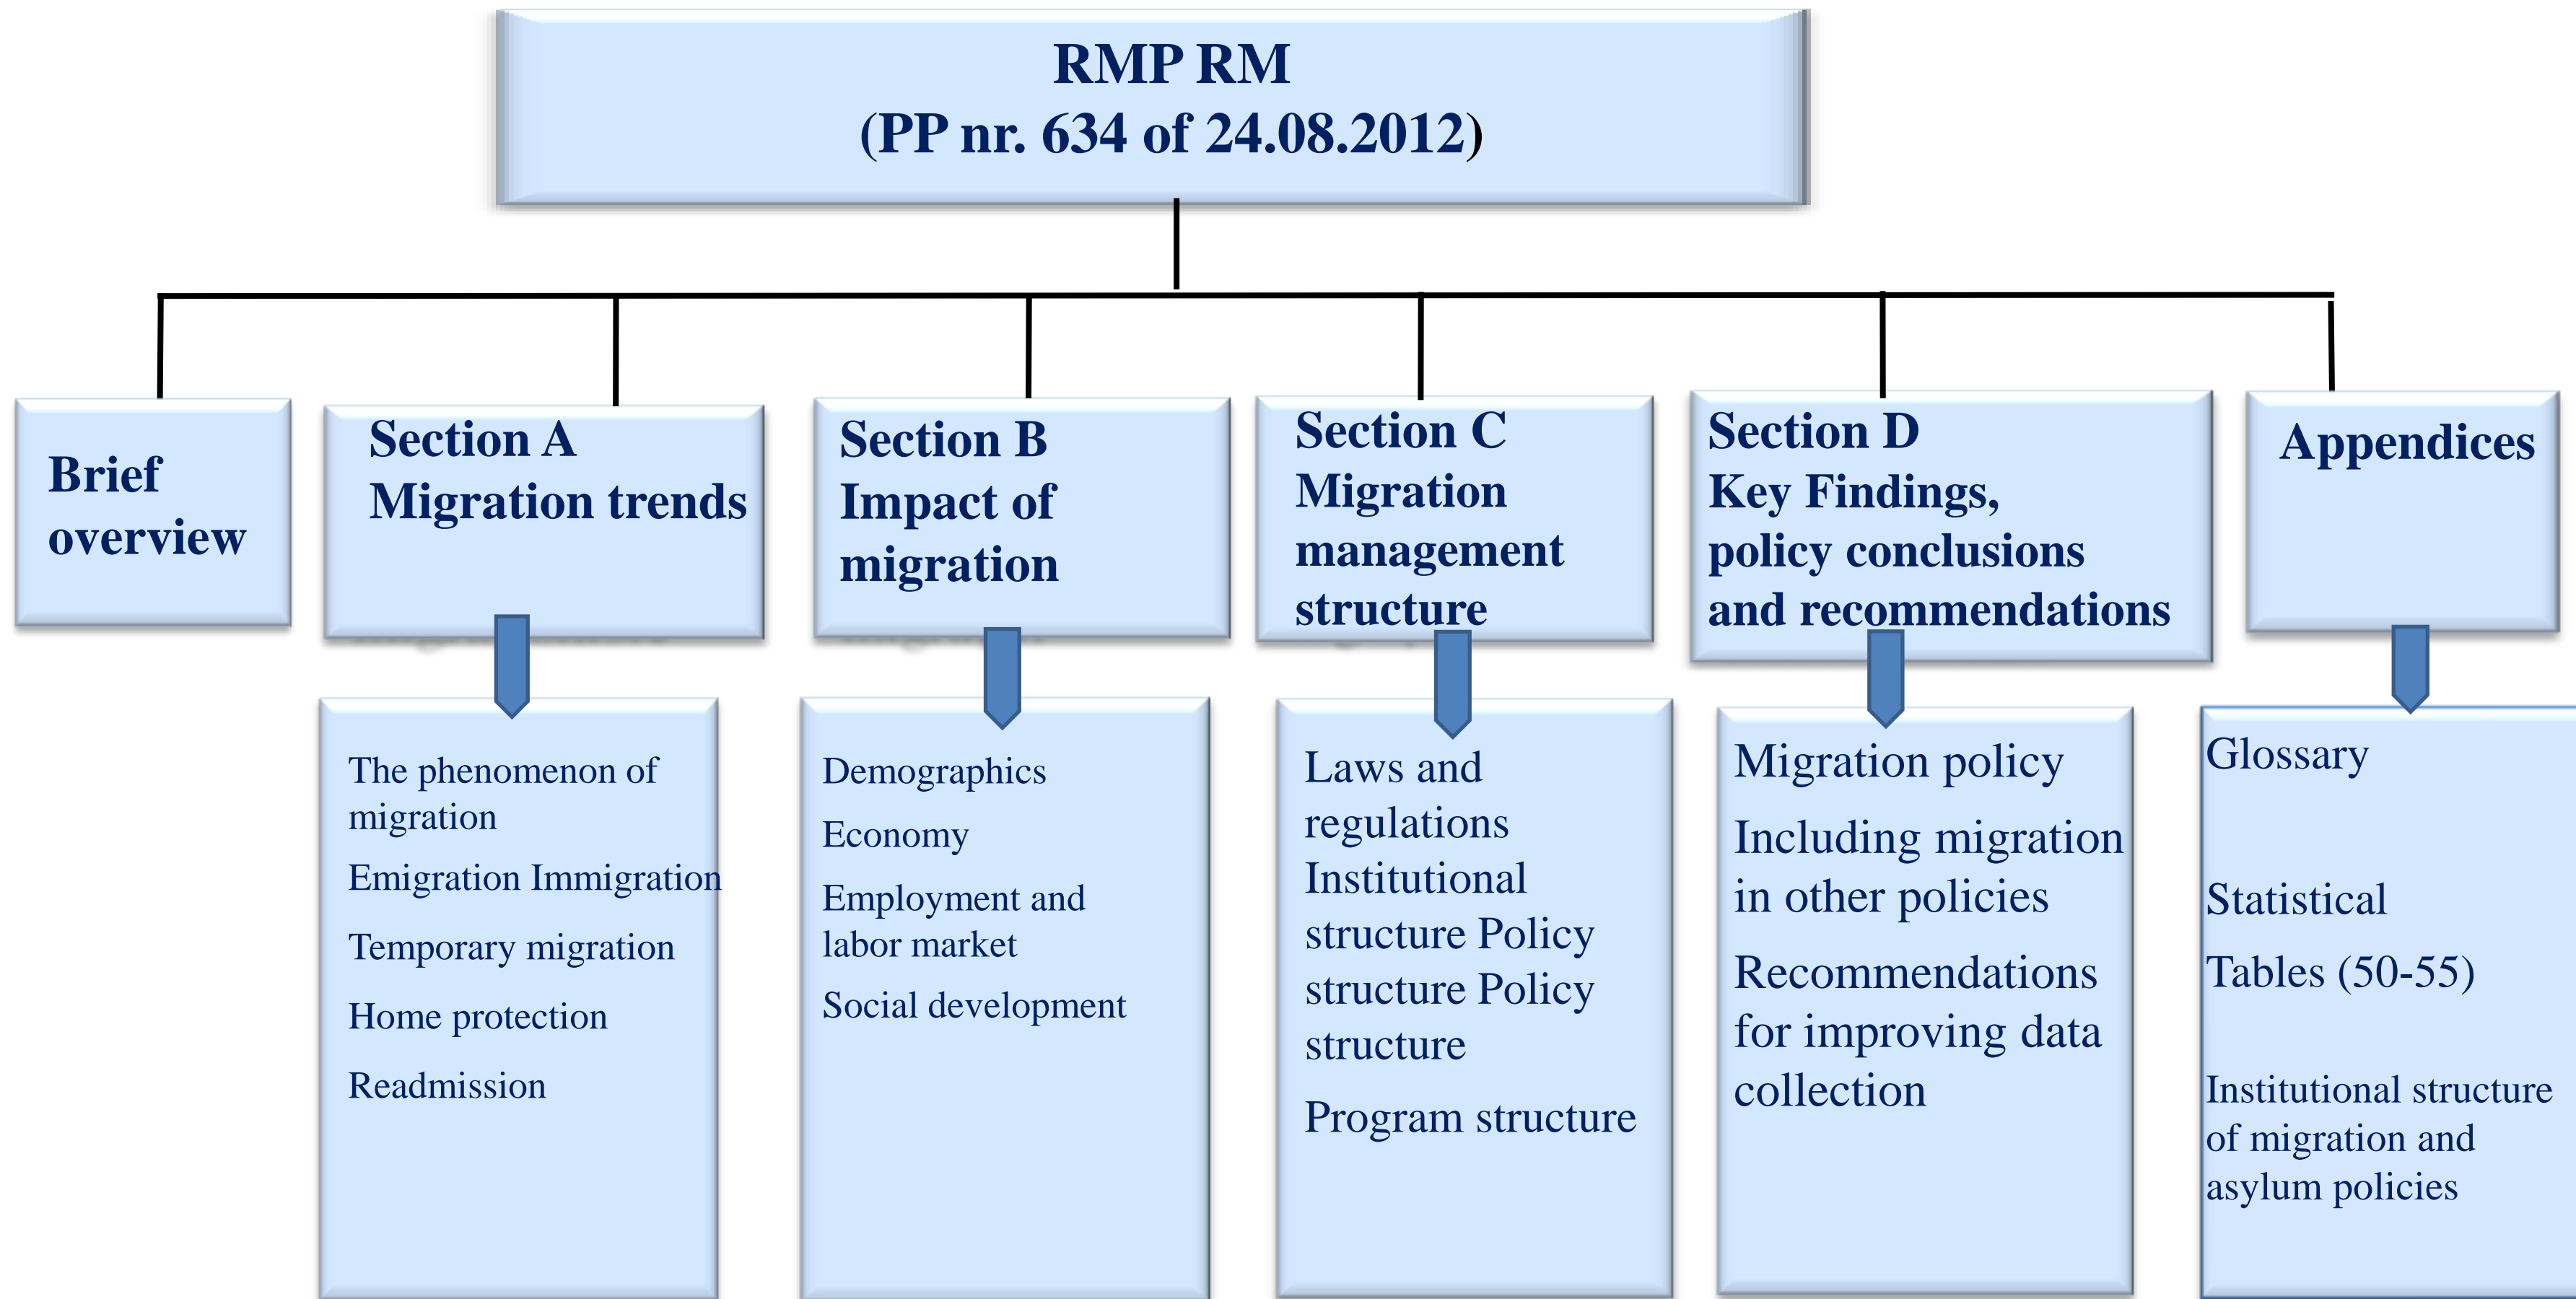

RMP is a statistical report that brings together in a structured way information on migration and its dynamics from various sources, which plays an important role in the development of national policies and improving the quality of data collection.

Serves as a tool for collecting and integrating administrative data on international migration since 2012. The body responsible for the development was appointed as the Inspectorate General of the Ministry of Internal Affairs of the Republic of Moldova.

Arguments: GIM produces most of the administrative data related to population migration (immigration of foreigners), keeps records:

- foreigners by purpose of arrival (family reunification, work, study, etc.);
- asylum seekers and refugees;
- recipients of humanitarian protection;
- illegal migration (illegal stay);
- responsible for the operation of the Integrated Migration Information System (includes and shelter);
- cooperates with the Border Police and has access to the data of the Border Police.
