Dear Respondent,

Dear Madam,

The Hungarian Central Statistical Office wants to carry out a sample survey concerning the 18-40 year old females. For the country we selected at random 4000 households in which ladies, females of such age live, independently of their present marital status. In this way we reached you.

The main purpose of the survey is to get a comprehensive idea on the changing habits, plans of family foundation and partner relations, on the factors motivating the parenthood, on the relationship between work, learning and family planning. The survey is a part of a European comparative study in which some twenty countries take part, among them Hungary, too.

We use the data only for analysis, and according to the law on statistics we treat the individual data anonymously and confidentially. The participation in the survey is voluntary.

You are requested to promote through your kind cooperation the successful data collection and to answer our questions.
