

Proposal for Corrigendum to ECE/TRANS/WP.29/2011/98 based on ECE/TRANS/WP.29/GRE/2011/20 - (Proposal for Supplement 8 to the 04 series of amendments to Regulation No. 48)

This corrigendum relates to document ECE/TRANS/WP.29/2011/98 based on ECE/TRANS/WP.29/GRE/2011/20 that will be considered by WP29 in November 2011. The experts from GTB have identified a possible conflict between Regulation 48 and the device regulations and request that GRE transmits this corrigendum to the 155th session of WP29 so that it can be considered together with the original proposal.

I. Proposal

Paragraphs 5.29. and 5.29.1., delete as follows:

~~"5.29. — A light source module shall be:~~

- ~~(a) — only removable from its device with the use of tools and~~
- ~~(b) — so designed that regardless of the use of tool(s), it is not mechanically interchangeable with any replaceable approved light source.~~

~~5.29.1. — A LED module does not need to be replaceable, if so stated in the communication sheet of the component type approval."~~

II. Justification

ECE/TRANS/WP.29/2011/98 (based on ECE/TRANS/WP.29/GRE/2011/20), introduced new paragraphs 5.29 and 5.29.1 relating to the definition of "Light Emitting Diodes (LED) Modules. However, during the preparation of documents ECE/TRANS/WP.29/GRE/2011/55, 56 and 57 it has become evident that paragraphs 5.29. and 5.29.1 contain requirements that should be included in the device regulations and should not be duplicated in Regulation No. 48.
