

**Correction to GRE/2017/14 (Proposal to introduce
requirements for the use of light emitting diode substitute
light sources in the new Regulation on Light-Signalling
Devices (GRE/2017/09))**

I. Proposal

GTB respectfully requests that the GRE experts, when reviewing the content of GRE/2017/14, ignore the proposal to amend paragraph 3.3.4.1.1.

II. Justification

During the preparation of GRE/2017/14 GTB inadvertently introduced a proposal to amend paragraph 3.3.4.1.1. of GRE-2017/09, the draft new Regulation on Light-Signalling Devices (LSD). This amendment was being considered by the GTB working groups but was ultimately dismissed and should not have been included in the GTB proposal.
