0	Summary	Suggestion	Please include a brief description for which purposes the specifications will be used in the summary text.		
0	Preface, p. i	Suggestion	Please write out UNFC, it is the only abbreviation that is not written out		
			within the preface.		
l. 2.	p. 1, 2nd point	Suggestion	Please include contact details.		
1. 4.	p. 1, 4th point	Suggestion	Describe anthroposphere at this point because it is necessary for understanding the definition of anthropogenic resources		
II. A. 10.	p. 2, 10th point	Amendment	Include "extraction" in line 4 of point 10.	" Anthropogenic Processes that include the extraction , transformation"	
II. A. 16.	p. 4, 16th point	Suggestion	Next to established markets also emerging or innovative markets should be considered, especially because some potentially recycable materials are not yet part of established markets		
II A.	p.2	Suggestion	It would be helpful, to draw a simplified scheme which adresses the hierarchies of the different material levels. Flows, stocks and products are too generic to be integrated, but these are already represented quite well in Figure 1.	Anthropogenic Material System Anthropogenic Material Project Anthropogenic Material Source	
II A	p 2	Suggestion	The basis terms "antibuon exemic resource" about the defined automainable		
		Suggestion	The basic term "anthropogenic resource" should be defined extensively in section II A and not only in the introduction section		
II A 16	p. 4, paragraph 16	Comment	in section II A and not only in the introduction section Please clarify that this term is not in accordance with the legal definition of products and may also comprise materials which are legally labelled and handled as waste. For the latter, markets exist but very often only on the basis of legal conditions which require a particular handling of waste. This has to be financed by the producers (product responsibility) or the owner/disposer of a product
