Ref.: information request on the development consent procedure of renewal of the gold mining project in Myжів (Nagymuzsaly), Ukraine

Dear Mr Deputy Minister,

I have been informed on the planned renewal of the gold mining project in Myжів (Nagymuzsaly), near to the Hungarian border.

Due to the potential transboundary environmental impact on Hungary of the planned activity, we would appreciate receiving your official information on the project and the related development consent procedure at your earliest convenience.

In addition, please be informed that Hungary considers itself as an Affected Party according to the Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention) regarding the gold mining project in Myжів. Based on this reason, you are kindly requested to notify Hungary officially, according to Article 2 (5) of the Espoo Convention when the project proponent submits its application for the development consent of the referred activity to the competent Ukrainian environmental authority.

Please, accept the assurances of my highest esteem.

Yours sincerely,

Dr. Illés Zoltán
State Secretary
