Agricultural Social Insurance Fund Branch in Suwałki with regard to the inquiry (the date received 27 March 2012) kindly informs that the aim of the Agricultural Social Insurance Fund is the large-scale activity in preventing accidents at farming work as well as preventing from the farming occupational diseases. We are achieving these objectives by dissemination the knowledge of risks, protection of life and health in farming. We are also analyzing the reasons and circumstances of the accidents as well as the occurrence of the farming occupational diseases. Our aim is also to make the effort to proper production and distribution of appropriate technical and organizational measures, including working and protective clothing used in farming. Our institution is involved in the adult and children training concerning the prevention of accidents.

The problem that was raised in the document referred to the safety and hygiene at work in the range of the electromagnetic field of the high-voltage 400 kV double-track line. Our institution does not have sufficient data, studies and reports that would be sufficient to estimate the impact of the electromagnetic field on human living.
