

To: Supreme Administrative Court in Sweden

Let's stop the Nord Stream 2 gas pipeline

We demand that the permit* for the construction and operation of the Swedish section of the Nord Stream 2 gas pipeline be revoked.

The pipeline is a threat to the energy security of Europe during the next dozens of years, making us dependent on natural gas supplied by an authoritarian, anti-European country, which violates human rights and civil liberties.

The project of Gazprom is a direct threat to the animals in the Baltic Sea, including species under unconditional protection, such as the Baltic porpoises and grey seals, and it will also exacerbate the current climate crisis.

* The permit for the construction and operation of the gas pipeline was issued on 7 June 2019 by the Swedish Ministry of Entrepreneurship and Innovation.

** The Foundation has already challenged the permit issued in Finland and joined the complaint against the permit issued in Germany. In other countries, there is no obligation to demonstrate public support.

Why is this important?

The complaint requesting that the permit for the gas pipeline be revoked was filed by ClientEarth Prawniczy dla Ziemi Foundation in the Swedish court. However, the Foundation has to prove that its actions against Nord Stream 2 are supported by Polish citizens. Public organisations have to comply with this requirement of the Swedish law.
