Subject: closure of your complaint on the construction of a prison at Beveren

Herewith we inform you that we have closed your complaint, which was originally registered under CHAP (2012) 01663 and then transferred to the EU Pilot (file 3717/12/ENVI) in order to ask for the comments on the authorities regarding the procedure leading to the issuing of the construction permit for the construction of a new prison in Beveren.

Before doing so we have taken account of your reply of 21 May 2013 (sent by email) to our pre-closure letter of 24 April 2013 by which you informed us that national court cases are still on-going. However, this did not change our conclusion that we reached due to the reasons presented in our letter of 24 April 2013. We would like to inform you that, once the decision is made by the national judicial authorities before whom you made your presentations, you may make a new complaint to the Commission based on the reasoning which you have set out in your most recent reply. We would like to emphasise however that the Commission services may only be able to take such a complaint further if there are sufficiently serious indications of an infringement of EU legislation.

Yours sincerely,

Ion CODESCU
