

**Statement on behalf of OEKOBÜERO; ACCC meeting March 2019**

**14 March 2019**

**Decision VI/8e (Czech Republic)**

Regarding the question of public participation in procedures according to the Nuclear Code, ÖKOBÜRO would like to point out that especially in permitting procedures regarding nuclear power plants and the possible environmental risks involved, it is crucial to provide for full public participation including notification of the public concerned in both, national and transboundary context. This is currently not the case in the Czech Nuclear Code.
