

Graduate Research Opportunities

Department of
Wood Science
& Engineering

The Department of Wood Science & Engineering at Oregon State University seeks a cohort (10+) of new graduate students (MS or PhD) to support research conducted by the newly founded **National Center for Advanced Wood Products Manufacturing and Design**. Center-sponsored research focuses on developing innovative wood products, building components, construction methods, & innovation in building design.

Graduate Research Assistantships (GRAs) are available in a broad range of specialties including basic sciences, business, & engineering. Students on a GRA will receive a monthly stipend & a tuition waiver, in addition to insurance benefits.

Dual degrees are possible in Wood Science and Civil Engineering, Materials Science, Mechanical Engineering, Design & Human Environment, & other disciplines. For students interested in architecture, there may be the possibility for a dual degree in Wood Science & Architecture through the University of Oregon's School of Architecture & Allied Arts.

Interested students should first contact a faculty member(s) in your area of interest: woodscience.oregonstate.edu/people/faculty. Submit the graduate school application, fee, & supporting materials before the end of **December 2015**: oregonstate.force.com.

If you have questions about the application or process, please contact the graduate program coordinator at woodscience@oregonstate.edu.

Applications will begin to be reviewed in January 2016 & continue until all positions are filled.
