Original: ENGLISH

#### ECONOMIC COMMISSION FOR EUROPE

INLAND TRANSPORT COMMITTEE

World Forum for Harmonisation of Vehicle Regulations (WP.29)

Working Party on Lighting and Light-Signalling (GRE)
(Forty-eighth session, 9-12 April 2002,

agenda item 1.3.)

### PROPOSAL FOR DRAFT AMENDMENTS TO REGULATION No. 48

(Installation of lighting and light-signalling devices)

## Addendum 1

## Transmitted by the Expert from the Working Party "Brussels 1952" (GTB)

<u>Note</u>: The text reproduced below was prepared by the expert from GTB, following the consideration of the original proposal by GRE, during its forty-seventh session (TRANS/WP.29/GRE/47, paras. 20-23). GTB examined the questions and suggestions made, and proposes in this document the improvements regarding definitions only.

GE.02-20436

 $<sup>\</sup>underline{\text{Note}}$ : This document is distributed to the Experts on lighting and light-signalling only.

#### A. PROPOSAL

The original proposal (TRANS/WP.29/GRE/2001/31) was:

2.7. "Lamp" means a device designed to illuminate the road or to emit a light signal to other road users. Lighting units of adaptive front lighting systems, rear registration plate lamps and retroreflectors are likewise to be regarded as lamps;

New proposal is:

Delete the amendment. This should be taken up when inserting the provisions concerning the AFS.

The original proposal (TRANS/WP.29/GRE/2001/31) was:

- 2.7.1.1.1. "<u>Replaceable light source</u>" means a light source which can be inserted in and removed from the holder of its device without tool;
- 2.7.1.1.2. "<u>Non-replaceable light source</u>" means a light source which cannot be removed from its device without damaging the device;

in case of a light source module: a light source which cannot be removed from its light source module without damaging the light source module.

#### New proposal is:

- "2.7.1.1.1. "<u>Replaceable light source</u>" means a light source which **is designed to** be inserted in and removed from the holder of its device without tool;
- 2.7.1.1.2. "<u>Non-replaceable light source</u>" means a light source which can only be replaced by replacement of the device to which this light source is fixed;

in case of a light source module: a light source which can only be replaced by replacement of the light source module to which this light source is fixed."

The original proposal (TRANS/WP.29/GRE/2001/31) was:

2.7.1.1.5. "Gas-discharge light source" means a light source where the element
for optical radiation is a discharge arc producing electroluminescence / fluorescence;

New proposal is:

The proposal shall not be changed. Do not take out `fluorescence'; the definition is correct.

The original proposal (TRANS/WP.29/GRE/2001/31) was:

2.7.1.1.7. "Electro-luminescence plate" means a light source where the element for optical radiation is an active layer producing electroluminescence;

New proposal is:

Delete the proposal and re-submit it as soon as the requirements would be defined.

The original proposal (TRANS/WP.29/GRE/2001/31) was:

The "Annex for clarification" was intended for the GRE document only.

New proposal is:

Insert new annex 10 and add a footnote referring to it to paragraphs 2.7.1. and 2.7.27., to read as follows:

"2.7.1. Light source \*/

• • • • • • • • •

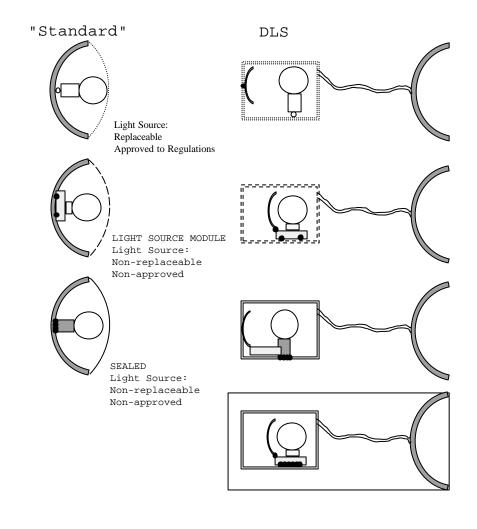

2.7.27. "Distributed lighting system" or "distributed light-signalling system" (DLS).means a lamp or lamp system comprising a lightgenerator, light guide(s) and outer lens(es). \*/

\*/ For clarification see annex 10"

Insert new annex 10, to read:

## "Annex 10

# EXAMPLES OF LIGHT SOURCE OPTIONS

\* \* \*

## B. JUSTIFICATION

The above proposal improves the definitions concerned. It was prepared in response to the first consideration by GRE of document TRANS/WP.29/GRE/2001/31.
