**COMMITTEE OF EXPERTS ON THE TRANSPORT OF  
DANGEROUS GOODS AND ON THE GLOBALLY  
HARMONIZED SYSTEM OF CLASSIFICATION  
AND LABELLING OF CHEMICALS**

**Sub-Committee of Experts on the  
Transport of Dangerous Goods**  
(Twenty-first session, 1-10 July 2002,  
agenda item 8(b))

**LISTING AND CLASSIFICATION**

**Correct assignment of UN Numbers to substances and solutions  
with respect to physical state (liquid or solid)**

**Transmitted by the experts from the Netherlands and Germany**

**Background**

In July 2001 the Sub-Committee discussed a joint paper from the Netherlands and Germany (ST/SAC.10/C.3/2001/14) concerning the assignment of substances and solutions to the correct UN number in relation to the physical state (liquid/solid). The principle to create separate entries for a solid and the solution thereof was adopted as well as the principle to create separate entries for those substances for which due to the different composition of isomers the entry can be both liquid or solid, see paragraphs 71 to 75 of report ST/SAC.10/C.3/38.

Furthermore in December 2002 the Sub-Committee was informed about the provisional results of the consequential work concerning the correct assignment of UN numbers, proper shipping names and packing instructions to substances with respect to their physical state (UN/SCETDG/20/INF.17), see paragraphs 62 and 63 of report ST/SAC.10/C.3/40.

Based upon the outcome of the discussion whether it is necessary to create new UN numbers in all cases and comments received intersessionally from the United Kingdom and further study of the regulations and consultation of the database of the BAM in Berlin, a list of all entries concerned was compiled (see the Annex to this document).

A further point concerns those substances for which due to different composition of isomers the entry can be both a liquid or solid. In those cases no additional entries for the solution are included.

As a consequence the principles adopted, the text of 3.1.2.4 should be deleted. In order to make things clear for the user it is proposed to use this paragraph with the following text:

“Many substances have an entry for both the liquid and solid state or for the solid and solution. These are allocated separate UN entries which are not necessarily adjacent to each other. Details are provided in the alphabetical index, e.g.

NITROXYLENES, LIQUID UN 1965  
NITROXYLENES, SOLID UN XXXX

In this way special provisions as suggested in UN/SCETDG/20/INF.17 can be avoided

Also in the process the following errors were found:

- UN 2511, 2-CHLOROPROPIONIC ACID, SOLID does not exist as it has a melting point of -12 °C (source: BAM Database and BIG Database)
- UN 3207, delete in column (9) special provisions B2 and B4 as special provisions B2 and B4 are not applicable to IBC instruction IBC01 and IBC02

### **Proposal**

- To adopt all proposed entries mentioned in the Annex which appear in the solid and in the liquid state together with the consequential amendments and to amend Chapter 3.2 and the INDEX accordingly.
- To adopt the proposed amendment of 3.1.2.4;

Replace current text 3.1.2.4 by:

*“Many substances have an entry for both the liquid and solid state or for the solid and solution. These are allocated separate UN entries which are not necessarily adjacent to each other. Details are provided in the alphabetical index, e.g.*

NITROXYLENES, LIQUID UN 1965  
NITROXYLENES, SOLID UN XXXX

- To adopt the found errors with regard to UN 2511 and UN 3207 and to amend Chapter 3.2 accordingly;

*Delete the entry for UN 2511, 2-CHLOROPROPIONIC ACID, SOLID and delete for UN 3207 in column (9) the special provisions B2 and B4 for PG II and PG III entry respectively*

### **Annex**

The attached annex lists all entries, which may appear in the solid and in the liquid state in one (or more) of the international regulations (UN Recommendations, IMDG-Code, RID/ADR and also CFR) together with the consequential amendments.

The existing UN number is used for the case described in the present regulations. A new UN number is proposed for the substance in the other aggregation state. In this list the consequential amendments are indicated. Consequential amendments are based on the rationalised approach of the issue concerned.

## Annex

### New entries and amendments to DGL (12<sup>th</sup> ed.) concerning "LIQUID/SOLID/SOLUTION"-problem Based upon ST/SG/AC.10/C.3/2001/14 - Annex 1

The information given in the columns (6) to (11) for the new entries are based upon the "Rationalized Approach" for packagings, RID/ADR and IMDG Code.

Where for solid entries in column (10) and (11) a T-code and/or TP-code is found between square brackets ( [ . ] ), this means that the 12<sup>th</sup> edition of the 'Orange Book' indicates a T-Code and/or TP-code for the concerned solid entry. However that for the final allocation of a T-Code and/or TP-code the Sub-Committee is requested to await the outcome of the discussion on transport of solids in portable tanks.

Note: "a new entry" = a solid, liquid or solution entry which has not been mentioned in the 'Orange Book' by means of the applicable packing instruction, column (8) (e.g. in 'Orange Book' an existing entry for a liquid/P001 ⇒ 'new entry' + new UN No. will be the solid/P002, etc.); or: the second mentioned entry under an existing entry with the same UN No. will become the 'new entry'.
