

Items for consideration as amendment to GTR

In order for us to meet the time planned and schedule, it had been raised at GRSG that the initial plan was to include the symbols in the GTR that did not raise any disagreement from members as these were already in everyday use and well known to the users and riders. The plan was that if any symbol raised lengthy discussions and required to be reviewed in conjunction with regional awareness then GRSG would consider to release these as amendments to the GTR to that it allowed for time to consult and comment for the members.

Currently the list includes the following symbols, proposed by the EU, that need agreement of all Members:

**ABS**  
**Brake**  
**Brake failure**  
**DRL**  
**Emissions related Malfunction Indicator Lamp (Yellow)**  
**Oil temperature**  
**Service reminder**  
**Stands**  
**Tyre pressure**  
**Vehicle speed control**

Comments have already been raised on these and are included in documents 03-MCSYM-09 and 02-MCSYM-10.
