Dear Olivier,

Please find below the position by DK on the above document.
Can you have it circulated to the members of the AEBS/LDWS IG meeting of today.

Thanks,

Johan

Subject: AEBS/LDWS-15-03 - DK comment

Dear Mr. Renders

Things are coming fast and late for discussion here.

Only being away one day from work, and you may be late for comments.

Denmark noticed, that 4 out of 5 suppliers on the demonstration day say that it will be no problem for cars without air suspension, and CLEPA tells the [same](#).

We are of the opinion that vehicles without air suspension shall not be excluded from the demand for AEBS. These vehicles must choose appropriate sensing systems.

If not at all possible to reach this solution we would support your 2-step approach (only warning for the non-air suspension vehicles).

Kind regards

Peter Dyrelund Jakobsen, vehicle engineer
