a. Laminated vs. toughened glasses

Background:

- The informal group was urged by IRU to provide guidance about whether promoting laminated vs. toughened glass in the Regulation
- The Chair and the Secretariat of the informal group understood from the discussions held at the 4th meeting of the informal group that a decision was made in the direction of promoting doors and hatches as emergency exits in order to overcome an impossible decision toward one particular window technology.
- This understanding is however challenged by Germany in their email dated 11 February 2011.

Background:

- No discussion was held at the 4th meeting on this subject
