

ECONOMIC COMMISSION FOR EUROPE

TRANS-EUROPEAN NORTH-SOUTH MOTORWAY (TEM) Strategic Plan 2016 -2021

TEM Project – need for the new formula and challenges

External factors:

- The rapid pace of development and widespread use of modern information technologies,
- New socio economic trends, which are shaped by modern technologies, such as so-called "sharing economy",
- Growing acceptance at the countries and societies level for sustainable development,
- Other similar, international/intergovernmental bodies and their activities

Internal factors:

- The new needs and expectations formulated by the member countries,
- The process of the new TEM Project co-operation agreement preparation

TEM Project value proposition

UNECE, ITC, Sustainable Transport Division WP1, WP5, WP6, SC1, WP29

I. TEM project supports UNECE and Inland Transport Committee in achieving the goals of sustainable development (the so-called SDGs) on issues related to the management of road infrastructure

TEM PROJECT

II. TEM Project will interpret and translate the SDGs into strategic initiatives related to the key issues of the management of road infrastructure

STRATEGIC INITIATIVES

TEM Project – approach to the strategic initiatives

- TEM Project will interpret and translate SDGs into strategic initiatives related to the key issues of the management of road infrastructure.
- Selects the initiatives which:

TEM Project – new strategic vision

The TEM Project aims at obtaining the role of a substantive partner for the UNECE and the Inland Transport Committee on road infrastructure management, thus supporting the UN and TEM MS in achieving the sustainable development goals by implementing the Project strategic initiatives.

TEM Project – new strategic mission

The TEM Project constitutes a forum for cooperation between the governments of TEM MS, which creates standards, good practices and guidelines for systemic and strategic issues related to road infrastructure management. In its activities the TEM Project takes the perspective of national government administrations, and focuses on the issue of sustainable development.

TEM Project organisational structure

UNECE, incl.:

- Inland Transport Committee
- Sustainable Transport Division
- SC1 Working Party on Road Transport
- WP.1 Working Party on Road Traffic Safety
- WP.5 Working Party on Transport Trends and Economics
- WP.6 Working Party on Transport Statistics
- WP29/GRPE The Working Party on Pollution and Energy (GRPE)

External Contributors

TEM Project – the list of the strategic areas

STRATEGIC AREAS	SDG'S
Area A - Environmental protection	3 GOOD HEALTH AND WELL-BEING 9 AND INFRASTRUCTURE 15 UPF ON LAND
Area B - Organization and financing of the roads and motorways	10 REDUCED 12 RESPONSBLE CONSIDERTION AND PRODUCTION
Area C - Information systems for the management of the road infrastructure	3 GOOD HEALTH 7 AFFORDABLE AND OCEAN PROCESSE 10 REQUILITIES 12 RESPONSEE NO PROCESSE AND PRODUCTION
Area D - Innovations in road infrastructure management	9 MARTIN MINISTRA 10 HINGED 12 REPORTED MINISTRA PROPERTY OF THE PROPERTY OF T
Area E - Road safety	3 CONDITION OF STREET SERVICES STREETS SERVICES STREETS SERVICES STREETS SERVICES STREETS SERVICES STREETS SERVICES SERV

TEM Project – timetable for 2016 - 2021

		2016	2017	2018	2019	2020	2021
	Organizational and consulting activities in connection with the						
	implementation of the Strategy 2016-2021						
	Area A - Environment and protection thereof						
	A.1 Evaluation of efficiency of the applied solutions for the protection of the						
	environment - the methodology / measurement standards.						
	A.2 Development of standards for road equipment in the context of						
	environmental protection.						
	Area B - Organization and financing of the roads and motorways system						
	B.1 Functioning and financing of the national management of road						
	infrastructure -solutions used in different countries.						
	B.2 Evaluation of the efficiency of toll collection system - evaluation						
	methodology.						
S	B.3 Conditions for creating an efficient PPP in the area of development and						
Ķ	maintenance of roads.						
Ε	Area C - Information systems for the management of the road infrastructure						
E	C.1 Maintenance standards of roads and highways.						
2	C.2 Measurement, collection and management of data in the management of						
5	road infrastructure.						
STRATEGIC INITIATIVES	C.3 Development of a standard catalog of public services and model						
	architecture of information systems in the management of road						
	infrastructure.						
	Area D - Innovations in road infrastructure management		l		li e		
	D.1 Use of alternative methods of energy production in the management of road infrastructure.						
	D.2 BIM Approach (Building Information Modeling) in the context of the						
	needs of the government road administration – analysis of the development						
	of methodology and examples of implementation of the BIM approach in the						
	government administration.						
	Area E - Road safety						
	E.1 Evaluation of efficiency of the applied solutions for the road safety - the						
	methodology / measurement standards.						
	E.2 Safety standards in work zones.
