The Cooperative: an innovative financial alternative

The Cooperative: more than a return on investment

The Cooperative Pillars:

- Investment in companies that provide positive environmental impact;
- We are co-proprietor and not co-investors;
- No speculation in order to making a short term profit;
- All shareholders have equal voting power and are equally treated;
- Time is a gift and we need to integrate it;
- Should annual yield exceed a certain level, a percentage of the share capital could be allocated to support projects that promote environmental protection.
- Full transparency;

Olivier Ferrari
