Single Window Environment B&H/ITA Readiness (Skopje, 2018)

About us

- The Indirect Taxation Authority (ITA) is a single authority in Bosnia and Herzegovina responsible for enforcement of legal provisions and policy on indirect taxation, as well as for the collection and allocation of indirect taxes revenue.
- The Indirect Taxation Authority is responsible for the collection of all indirect taxes in Bosnia and Herzegovina: value added tax, customs duties, excise duties and road taxes.
- Our priorities are to achieve the high goals set by the process towards future EU integration, such as better exchange of information between other institutions

Information System of ITA

IS subsystems

Customs subsystem – ASYCUDA World

VAT subsystem – new tax application

NCTS – new computerized transit system

PKI – electronic signature

DMS – electronic document management system

SINGLE WINDOW ENVIRONMENT BiH/ITA SYSTEM COMPONENTS

ePOST (CN 22/23)

ASYCUDA Portal

ITA - SINGLE WINDOW ENVIRONMENT

Main functional requirements

Integrated Customs Information System (ICIS)

Core functions – ICS, ECS, Transit, Risk Management, Customs Valuation, ITMS. Scheduled for implementation: Travellers declaration, Cash declaration, eCargo Manifest, APIS, ePOST

Support functions – System Administration, Common Reference Tables, Web Services Gateway etc.

Electronic declarations - Cargo manifests, T1 documents, TIR Carnets, SAD's & DV1's. All e-documents are integrated with each other

Single Electronic Access Point/Single Window Portal

Allow a trader to lodge all his declarations via one single interface. This data can then automatically be made available to any Customs office/CBRA responsible for the place at which goods have been or are to be presented.

ITA - SINGLE WINDOW ENVIRONMENT

Main functional requirements

- ✓ **Interagency business processes**
Information can be easily shared between all authorities/agencies involved in movement of goods, in a fully secure/confidential environment. Facility for automatic selection of processing path, full integration of CBRA interventions and handling result of control
- ✓ **Integrated, Multi-agency Risk Management**
The Multi-agency Risk-Management allows for joint approach to risk-management, shared use of specialised equipment (e.g. mobile X-rays, vehicles with thermo cameras, national laboratory networks etc.) for the use of various agencies
- ✓ **Interoperability and data exchange**
The SW can be easily configured to inter-operate on-line with external/governmental systems and databases (sys2sys)
- ✓ **Barcodes and automatic processing**
ASYCUDA can generate barcodes for each document produced. Barcode readers can be used for automatic processing (e.g. automatic arrival at destination, automatic discharge, exit etc.)

ITA - SINGLE WINDOW ENVIRONMENT

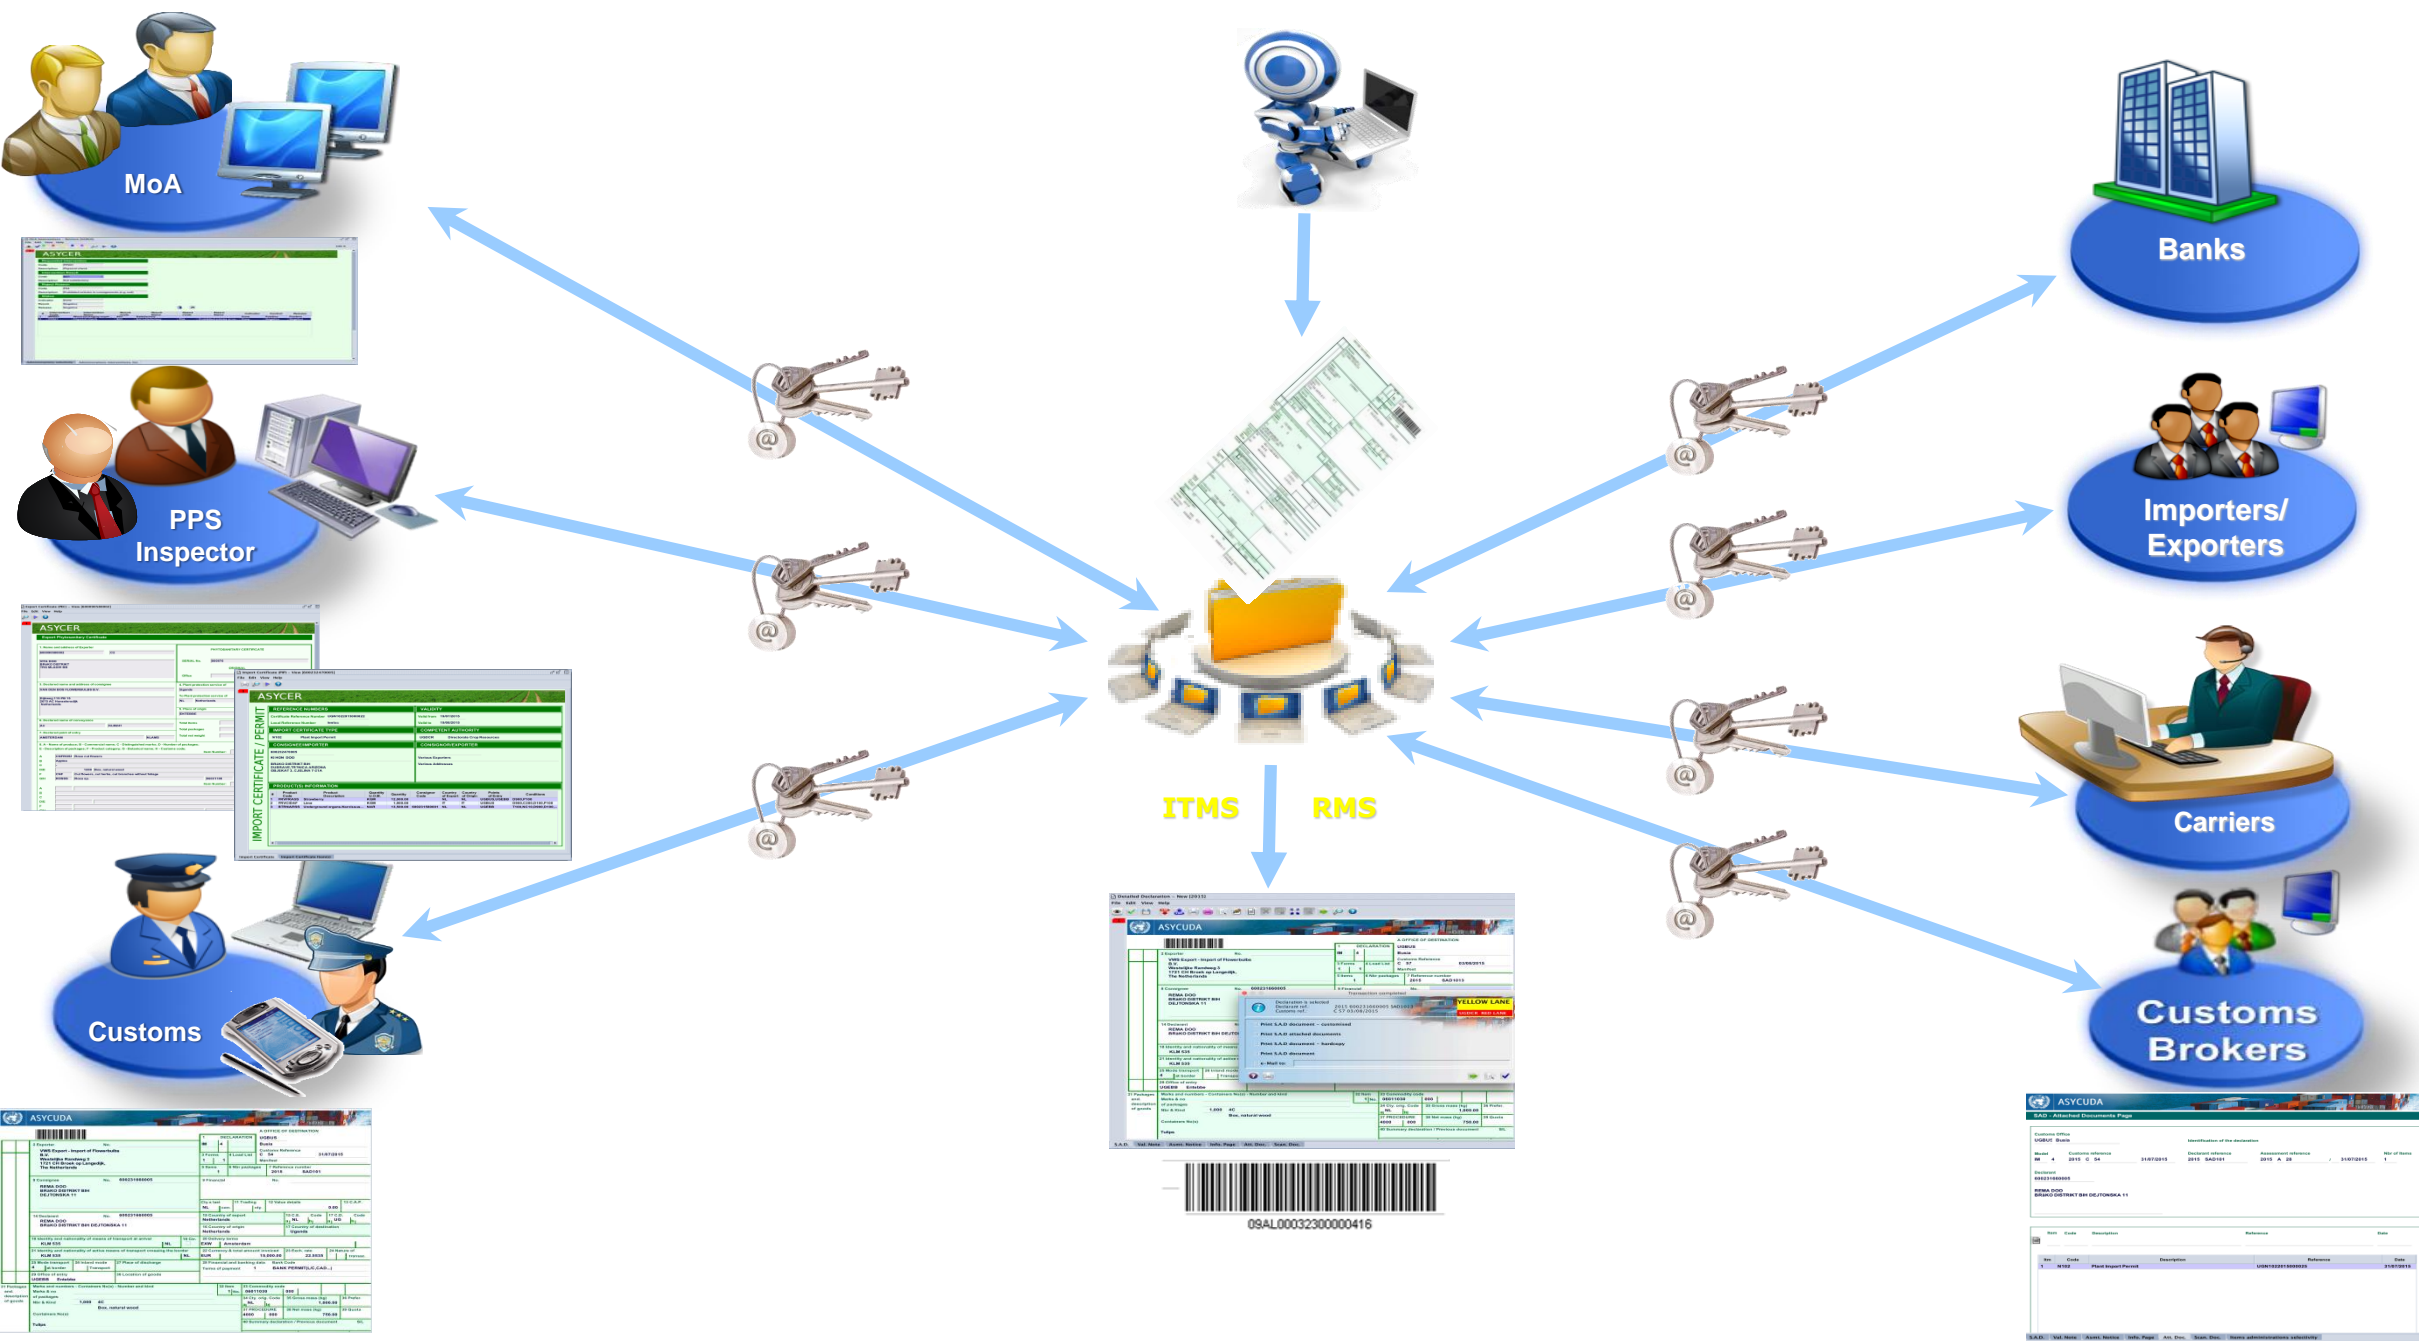

Main functional requirements

- ✓ **Document integration and re-use of data**
Facility to re-use, validate, cross-check and write-off automatically data, e.g. ENS-SAD, ENS-T1, SAD-SAD, SAD Manifest, SAD-T1 etc.
- ✓ **Electronic signature**
Facility to sign customs declarations, applications and supporting documents
- ✓ **Common Reference Database services**
Facility for creating and maintaining reference data, checking validity of data, tracking of change (who made the change, at what time and date, on what table and what modification was made)
- ✓ **Integration of electronic payment methods**
Facility for collect, process and reconcile payments in relation with all system eDocuments
- ✓ **Uniform User Management**
- ✓ **System monitoring, audit and administration**

News

Interagency Business Processes

© December 12, 2014

TA's ICIS (Integrated Customs Information System) functional and technical platform, based on the ASYCUDA system developed by UNCTAD, allows - easy integration of the operations of other administrations and/or regulatory bodies involved in export/import procedures - handling of results of common controls, risk-analysis, operations and feedback - sharing of information between all authorities and agencies involved in the movement of goods, in a fully secure/confidential environment.

Main Benefits for the Business Community

© November 30, 2014

The ITA's ICIS (Integrated Customs Information System), based on the ASYCUDA system developed by UNCTAD, provides the economic operators with a series of major benefits, summarised below.

e-Cargo Manifest

© November 28, 2014

The ITA's ICIS (Integrated Customs Information System) Cargo Manifest is designed to cover all modes of transport: air, sea and road transport documents.

Welcome to the ASYCUDAWorld Portal of the Indirect Taxation Authority!

ITA Readiness & conclusions

- ITA following all international standards, recommendations and technical improvements related to their responsibilities and projects;
- ITA recognized that Customs should have key role in SW system in Bosnia&Herzegovina;
- All agencies and stakeholders should participate in this complex project;
- Best practices should be collected at different workshops/events etc.

Thank you for your attention
