Economic Commission for Europe
Executive Committee
Centre for Trade Facilitation and Electronic Business
Twenty-fourth session
Geneva, 30 April and 1 May 2018
Item 7c of the provisional agenda
Recommendations and standards: Related issues

Note by the secretariat

Summary
UN/CEFACT delivers recommendations and standards of global impact, but developing statistics to reflect their widespread use is not easy. At the request of the Plenary (ECE/TRADE/C/CEFACT/2016/2, Decision 16-16), a survey was launched during the period May 2017 to April 2018 with mixed results because of low rates of response. However, these have been compared in this document with web site visits/downloads and statistics provided by the user community on a specific standard.

This report is presented to the 24th Plenary for information.
I. The questionnaire

1. The United Nations Centre for Trade Facilitation and e-Business (UN/CEFACT) develops recommendations and standards that are of global impact. A good number of guidance documents and individual electronic messages are available in the UN/CEFACT deliverables. However, there are no clear statistics on the use of these or their impact. The 22nd UN/CEFACT Plenary requested insofar as possible that such statistics be gathered (ECE/TRADE/C/CEFACT/2016/2, para 64, 22nd Plenary Decision 16-16).

2. A questionnaire was drafted (ECE/TRADE/C/CEFACT/2017/INF.3, see Annex I) and shared with the 23rd UN/CEFACT Plenary (ECE/TRADE/C/CEFACT/2017/2, para 59-61). This questionnaire listed all of the deliverables by domain of activity, as well as the code lists, the recommendations and the technical specifications. Plenary members did express some reservations as to the capacity and willingness of individuals to respond to such a large questionnaire – their reservations proved true.

3. The questionnaire was launched directly after the 23rd Plenary. Despite several email campaigns to request experts and individuals to respond, only 35 usable responses were received over the past year; a dozen in the month following the publication of the questionnaire and a little more than a dozen in the weeks leading up to the preparation of this document after a strong telephone campaign. Many knew UN/CEFACT standards and stated that they use them but were not capable of listing each one individually – or they could just provide one or two examples, omitting the ones for which they were not certain.

Figure 1: coverage of respondents

4. The majority of responses were from the United Nations Economic Commission for Europe (ECE) region, but also from Japan, China and India. (See Figure 1). Most of the respondents use Supply Chain, Customs and Transport & Logistics standards. Agriculture and Accounting/Audit standards were also cited as the more predominantly used. (See Figure 2).
5. The survey detailed the different United Nations Electronic Data Interchange for Administration, Commerce and Transport (UN/EDIFACT) messages which are most often used. Several transport/logistics messages are indicated as the most used (Despatch advice, Dangerous goods notification, Arrival notice, Cargo handling, Container discharge report…) as well as Supply Chain message (Purchase Order). (See Figure 3).

6. The Cross-Industry family of Supply Chain Management eXtensible Markup Language (XML) deliverables are the most cited among the XML messages. The agricultural XML deliverables are also well cited. (See Figure 4).
7. The responses to the use of UN/CEFACT maintained code lists were not meaningful as almost all of the above mentioned standards make reference to multiple code lists in each message and these were not cited. The code lists seem to be widely used, but not well known.

8. The use of ECE trade facilitation recommendations were well cited and almost all of them were referenced, even some that might be in need of updating such as Recommendations 8 (Unique Identification Code methodology – UNIC) and 18 (Facilitation measures related to international trade procedures). (See Figure 5).

9. The UN/CEFACT technical specifications actually had the highest number of respondents and all are well referenced within the survey pool. (See Figure 6).
The survey also allowed a free-text response to ask what respondents thought generally about UN/CEFACT. The responses include: “UN/CEFACT is an organization…”

- … bringing together private and public sector stakeholder across business domains
- … for standardization of trade-facilitation and electronic business
- … that helps to make international trade better, quicker and easier
- … for development and communication of global trading standards
- … for standardization of data exchange and eBusiness
- … supporting EDIFACT messages and Electronic Business XML (EbXML)
- … providing international communication standards
- … for semantic interoperability
- … promoting standards, developed Electronic Data Interchange (EDI), have important role in trade facilitation
- … for inter-government trade-facilitation
- … proceeding trade-facilitation and eBusiness
- … paramount standardization body in the area of trade facilitation and e-business
- … key to interoperability in Trade Facilitation and eBusiness especially for Developing countries and SMEs
- … for which is very important to have worldwide participants

A second open question asked for suggestions to improve UN/CEFACT’s organization or deliverables. Responses included:

- Communication suggestions:
  - Communication supported by secretariat staff
  - Better communication to attract new experts
  - Better communication between plenaries
  - More visibility
o Develop its communication channels with the goal of spreading its standards and attracting industry experts

- Experts suggestion:
  o New (young) experts
  o Engage private Sector

- Organization suggestions:
  o Better harmonization of standards
  o Better reuse of components
  o Maintain current standard
  o Overcome tradition, rivalry and personal differences

- Technical suggestions:
  o More guidance to stimulate EDI messages implementation
  o Shorten xsd tag names
  o UN/CEFACT should be Core Component Library (CCL) developer and maintainer

12. Finally a last open question asked if they knew of any organizations or individuals in their country promoting UN/CEFACT standards. Responses included: JASTPRO, Supply Chain Information Platform Study Group (SIPS), AgroConnee, Floricode, FruglCom, Rijksdienst voor Ondernemend (RVO), Nederlandse Voedsel- en Warenautoriteit (NVWA), INDICOD, Fiat group, Sue Probert, Frans van Diepen, Conny Graumans.

II. Downloads from the website

13. The statistics from this survey may lack a critical mass of responses. However, the above results can be compared to other sources of data which can confirm some of these findings. During the one-year period of April 2017 to March 2018, the internet page visits of our deliverables include the following (number of page views in parenthesis):

- Business Standards
  o Codes for Trade and Transport Locations (UN/LOCODE) – all pages combined (25,494)
  o UN/EDIFACT (4118)
  o XML schema D17A (870)
  o XML schema D17B (517)
  o D16B Supply Chain Reference Data Model (SCRDM) (269)
  o CCL 17A (246)

- The BRS include:
  o SCRDM v1.0 (86)
  o Electronic Road Consignment Note (eCMR) v1 (84)
  o Fisheries Language for Universal eXchange (FLUX) v1.1 (78)
  o Cross-Industry Invoice (CII) v2 (55)
  o Electronic Export Specification (eCert) (45)
  o Accounting Bundle Collection v1.2 (39)

- Technical specifications
• Core Component Technical Specification (CCTS) v2-01 (333)

• Trade facilitation recommendations:
  o Recommendation 1 – United Nations Layout Key for Trade Documents (835)
  o Recommendation 4 – National Trade Facilitation Bodies (212)
  o Recommendation 33 – Single Window Recommendation (758)

• Code list recommendations:
  o Recommendation 9 – Alphabetic Code for the Representation of Currencies (882)
  o Recommendation 16 – UN/LOCODE, Code for Trade and Transport Locations (694)
  o Recommendation 20 – Codes for Units of Measure Used in International Trade (4001)
  o Recommendation 20.rev3 Informative Annex 2e (570)
  o Recommendation 21 – Codes for Passengers, Types of Cargo, Packages and Packaging Materials (with Complementary Codes for Package Names) (211)

III. 30 years of UN/EDIFACT

14. The final source of comparison includes the statistics presented during the Forum Conference on 5 October 2017 celebrating 30 years of UN/EDIFACT. Each of the presenters were requested to show the use of UN/EDIFACT messages in their specific areas.¹

15. The Maritime cargo presentation showed a clear progression of UN/EDIFACT messages annually. And over the past three years, there have been significant increases in the number of messages. See Figure 6.

16. The Port Community Systems found that for maritime trade, UN/EDIFACT is used by 90% of all carriers/agents, 95% of all terminal operators, 80% of the world’s port authorities, 97% of customs administrations, 40% of road/barge/rail planning.

17. The Ship Planning sector underlined that just for containerized maritime traffic, there are 32 UN/EDIFACT messages per second (115,000 message per hour; over 1 billion messages per year). For the

¹ All presentations and statistics are available on the event website at: http://www.unece.org/index.php?id=46562 (as of April 2018)
single BAPLIE message, which shows the location of all containers on board a vessel, these messages replace over 500 sheets of paper per consignment arrival.

18. The freight forwarder presentation showed that there are providers abandoning XML messages and adopting UN/EDIFACT messages because of their stability and reliability, also because these messages are freely available and neutral in nature. After six months of adopting UN/EDIFACT as their core message exchange, they exchanges over 4.5 million status messages (IFTSTA), 15,000 electronic booking messages (IFTMBF) and 4,000 electronic shipping instructions (IFTMIN). They demonstrated how this allowed them to increase their return on investment.

19. Representatives from the healthcare industry presented their use of UN/EDIFACT use of messages, with over 1 million messages per year, mostly on commercial messages such as ORDERS (commercial purchase order), INVOIC (commercial invoice), ORDRSP (order response), DESADV (despatch advice)… Their sales are 75% based on EDIFACT messages, their purchasing is 100% EDIFACT and their transport messages are 60% EDIFACT. They use native UN/EDIFACT messages but also EDIFACT-compliant messages developed internally and by GS1.

IV. Preliminary conclusions

20. The survey, the statistics from the website and the return on experience from the conference celebrating 30 years of UN/EDIFACT provide multiple sources of information showing the wide usage and importance of UN/CEFACT standards.

21. Considering the different sectors that UN/CEFACT standards cover, targeted sectorial surveys might be envisaged in the future to better capture the use of these standards. Implementation examples and use cases, building upon the existing repositories for Recommendation 33 on Single Window and others, would also be very valuable to give practical examples of standard use.

22. Finally, future conferences highlighting the actual usage of UN/CEFACT standards might be considered in the future in order to recuperate similar statistics, but on specific types of deliverables.
Welcome!

Thank you for participating in the Survey on
"UN/CEFACT Deliverables Use"

Your input is very important to us.
INTRODUCTION

About the Survey:
The UN/CEFACT Bureau with support from the UNECE Secretariat is conducting the first Survey on "UN/CEFACT Deliverables Use" to gather relevant data and information from Member States and international organizations.

Outcome:
The results of this Survey will lead to the production of a report on how and with what frequency UN/CEFACT deliverables are being used. It is envisaged that, whenever possible, the Report will be presented at important meetings, such as the 30th UN/CEFACT Forum in October 2017.

Target:
This Survey is addressed to UN/CEFACT Heads of Delegations, private sector, public sector as well as Standards Developing Organizations and academia. All of them are strongly encouraged to provide their input or coordinate collection of input from their countries.

Contacts:
Any questions or requests for additional information can be addressed to:

- Mrs. Maria Ceccarelli, maria.ceccarelli@unece.org

Advice on completing the questionnaire:
Kindly complete the questionnaire as much as you can. A partially completed questionnaire according to your expertise is totally acceptable.

Deadline:
Data collection will take place until XX-XXXX-2017.

Terminology:
- CCL: Core Components Library.
- UN/EDIFACT: United Nations rules for Electronic Data Interchange for Administration, Commerce and Transport.
- XML: Extensible Markup Language.
* All fields are mandatory
