Corner stone for ASEAN Community
The initiative of ASW is working very closely to the establishment of the “ASEAN Community” by 2015.
It is indispensable for all countries to have their own National Single Window as the trade-related procedures of all ASEAN countries become efficient and transparent that is very important to make ASEAN a Single Market.
This is one of the main objectives of the “ASEAN Community”. 
Program towards the live implementation

① ASW pilot project with a scaled-down architecture is conducted in 2012 among seven ASEAN Member States except Cambodia, Myanmar and Lao PDR.

② The pilot of the full-fledged architecture expected to be carried out in 2013 followed by a full evaluation.

③ The result of the evaluation of the pilot on the full-fledged architecture will be available in 2014.

④ The result of the evaluation will help ASEAN to decide on the ultimate ASW for its ‘live’ implementation in 2015.
**ASW Gateway Application:**

① *Centrally developed and hosted by each ASEAN Member States.*  
② Each ASEAN Member States has **their own ways** to connect their respective **National Single Window**  
③ security is also under their full purview.
