Business Domain: Accounting and Audit

Business Process: Accounting Trial Balance

Document Identification: CEFACT/Forum/2006/TBG/BSxxx

Title: Accounting Trial Balance

UN/CEFACT International Trade and Business Processes Group: TBG12

Document location : <http://www.unece.org/...>

Version: 1.3
Release:
Date of approval: 2006-01-01

Document Summary

Document Item	Current Value
Document Title	Requirements Specification Mapping Trial Balance
Date Last Modified	2010-08-31
Current Document Version	3.0
Status	Final
Document Description (one sentence summary)	Specification that describes the data model and targeted technology solutions for the trial balance process.

2 Introduction

The current practice of exchange of business documents by means of telecommunications – usually defined as e-Business presents a major opportunity to improve the competitiveness of companies, especially for Small and Medium Enterprise (SME) whatever its size can be.

About all the functions within any entity provide input to accounting entries and accounting entries in turn will provide output towards aggregated figures from accounts.

Each individual accounting entry, with standardized tagged elements is the basis for a very powerful tool and from this point on, the [no longer missing] link between e-Business and e-Accounting / WebLedger.

Carrying on an initiative of EDIFICAS Europe, the European Expert Group 11 (EEG11) – Accounting and auditing – started the discovery of elements for trial balance in 2009, inter alia based upon the BALANC Edifact message.

The trial balance has been developed with contributions and submissions from several parts of Europe and collaboration of United States.

This first version of the Business Requirements Specification (BRS) is presented for comments from the other regions.

After a period of public exposure TBG12 will draft the final version of the BRS addressing comments received and forward for further processing through the UN/CEFACT Forum process with the goal of developing a UN/CEFACT standard document.

The purpose of this document is to define globally consistent trial balance processes for the worldwide accounting and auditing domains, using the UN/CEFACT Modeling Methodology (UMM) approach and Unified Modeling Language to describe and detail the business processes and transactions involved.

The structure of this document is based on the structure of the UN/CEFACT Business Requirements Specification (BRS) document reference CEFACT/ICG/005.

3 Objective

The objective of this document is to standardize the information entities and the business processes, of the Trial Balance used by the enterprises and auditors.

After entering transactions, preparing a trial balance is the next step in the accounting cycle.

A trial balance is a list of all or selected accounts contained in the ledger of an enterprise for a given period – usually a month. This list will contain the name of the ledger account and detailed values of this ledger account.

The appropriate columns are generally as follows:

- Assets = Debit balance
- Liabilities = Credit balance
- Expenses = Debit Balance
- Equity = Credit balance
- Revenue = Credit balance

The Trial Balance is valid for financial accounting, cost accounting, provisional or budgetary accounting, and more generally for any kind of various and numerous analytical accounting processes.

The trial balance is a vital step in the accounting cycle, being the first step in the "end of accounting period" process.

The business document consists of a set of Business Information Entities (BIE), which are preferably taken from libraries of reusable business information entities. The contents of the business document and the Business Information Entities are presented using class diagrams.

3.1 Definition of terms

Terms	Definition
Account	A ranking and recording unit of entries corresponding to expenditure and receipts relating to a particular period and/or purpose. Contains either the detail of all entry lines booked into this account and/or the totals summarizing debits and credits.
Bookkeeping	Activity that consists in sorting and recording into accounts the financial flow related to any transaction and economic fact occurring in an entity.
Irreversibility	The fact that an accounting entry posted into accounts and books can not be undone or altered.
(Accounting) Voucher	Basis of the posting into account and support of evidence, the voucher is a document that attests to the reality of an operation, authenticates its conclusion, is the originator of accounting entry, and is used for audit control matters.

3.2 Target technology solution(s)

The canonical class diagram of the trial balance presented in this document should be used to generate the UN/CEFACT ebXML standard schema of the trial balance in the accounting and audit domains. This RSM document together with the corresponding BRS document and the ebXML schema are intended to be the basis for the standard trial balance.

4 Information payload to be implemented

4.1 Conceptual data model

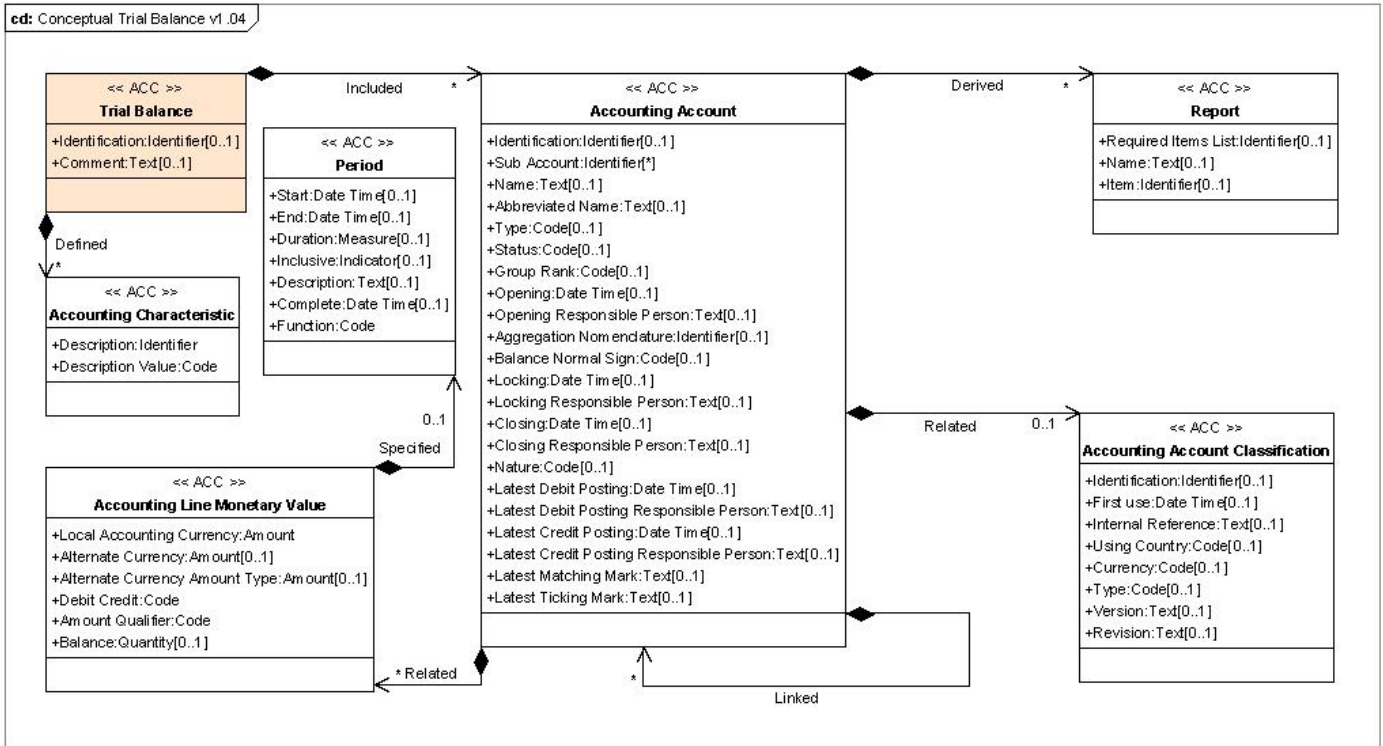

4.1.1 Trial balance definition

The accounting and auditing partners of an enterprise require accounting information, most of which is of a common nature. In order, therefore, to cope with the practice, an enterprise (parent company, subsidiary, division, etc.), a service bureau, a chartered accountant or an auditor - referred to as a sender - may transmit balances to the various parties involved – known as recipients - such as another enterprise (parent company, subsidiary, division, etc.), another service bureau, another chartered accountant or another auditor.

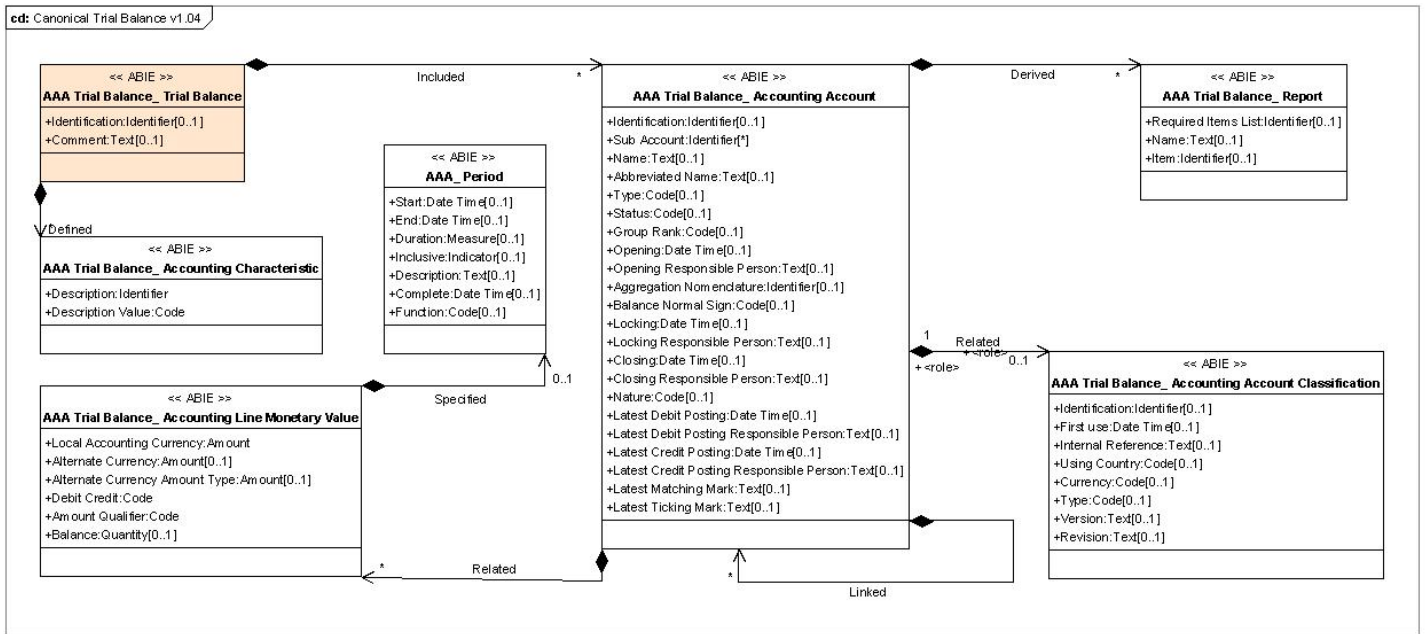

The trial balance is based on the accounting entries reflecting the activity of the enterprise and the chart of accounts. It enables the preparation of the financial statements. The term balance is taken to mean an accounting document that for a given period consists of a list of all accounts from the same accounting system. Each account indicates debit or credit total amounts in local and foreign currencies. The balance can be transmitted at a given moment for control purposes. The message BALANC contains information concerning a balance for a given period.

The frequency of this message ranges from daily to annually.

4.1.2 Trial Balance Conceptual data model

4.1.3 Canonical data model

5 Business information entity reference

This section contains the list of all the Business Information Entities that are both used within the canonical data model and are variations from the standard Core Components, including the UN/CEFACT Registry version that served as the reference point.

5.1 Basic Business Information Entities

This section identifies any restrictions that have to be applied to the BBIE in the context in which it is being used.

BBIE dictionary Trial Balance name	Data Type	Usage Rules	Core Component dictionary Trial Balance Name	Content Component Restrictions			Supplementary component Restrictions

5.3 Association Business Information Entities

This section identifies any all the ASBIEs where multiplicity restrictions will be applied.

ASBIE name	Multiplicity restriction	Additional comments
AAA Trial Balance_ AAA Trial Balance. Included. AAA Trial Balance_ Accounting Account	1..*	A number of accounting accounts in a trial balance.
AAA Trial Balance_ Trial Balance. Defined. AAA Trial Balance_ Accounting Characteristic	0..*	Contains from zero to many accounting characteristics.
AAA Trial Balance_ Accounting Line Monetary Value. Specified. AAA_ Period	0..1	Contains from zero to many periods.
AAA Trial Balance_ Accounting Account. Derived. AAA Trial Balance_ Report	0..*	A number or reports in an accounting account.
AAA Trial Balance_ Accounting Account. Related. AAA Trial Balance_ Accounting Account Classification	0..1	An accounting account in relation with an accounting account classification.
AAA Trial Balance_ Accounting Account. Linked. AAA Trial Balance_ Accounting Account	0..*	Each accounting account may be linked with a number of accounting accounts.
AAA Trial Balance_ Accounting Account. Related. AAA Trial Balance_ Accounting Line Monetary Value	1..*	Each accounting account may be related with a number of accounting line monetary value.

5.4 Qualified data type

The qualified data type codes lists used in the message “Trial Balance” may be either restricted enumeration from UN-EDIFACT/UNCL maintained by UN-CEFACT, or from ISO official lists of codes, or are lists maintained by EDIFICAS EU when the code list was created for typical accounting purpose.

In the current RSM document the terms “D10B” used as part of EDIFICAS EU codes lists name belongs to the standard UN-CEFACT versioning codification scheme. Qualified data types used in this message can be downloaded from <http://www.edificas.eu/index.php/eng/Download/Code-lists>

5.4.1 EDIFICASEU_AccountingAccountNatureType_D10A.TXT

1	Receivable Third
2	Payable Third

4	Income
5	Assets

5.5 Associated documentation

5.5.1 Core components UN/CEFACT Registry version used

The Core components UN/CEFACT Registry version used for this document and Core Components Library version 10A, together with the TBG17 Core component library submission for the ABIEs, BBIEs and ASBIEs of the Trial Balance Message approved by TBG17.

5.5.2 Root Level Message Assembly

The root element of the Trial Balance Message is the only one.

The Trial Balance Assembly template is attached here.
