

On 25 September 2015, the United Nations General Assembly adopted a set of Global Goals for sustainable development. The Global Goals aim to end poverty, protect the planet, and ensure prosperity for all as part of a new sustainable development agenda.

Goal 7 "Ensure access to affordable, reliable, sustainable and modern energy for all":

- By 2030, ensure universal access to affordable, reliable and modern energy services
- By 2030, increase substantially the share of renewable energy in the global energy mix
- By 2030, double the global rate of improvement in energy efficiency
- By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology
- By 2030, expand infrastructure and upgrade technology for supplying modern and sustainable energy services for all in developing countries, in particular least developed countries, small island developing States, and land-locked developing countries, in accordance with their respective programmes of support.
