

The Gas Centre Database

2005 Work Review

2006 Work Plan

What was done since last year

- Implementation of the changes adopted last year
- Improvement of the web site
- Update of the database
- Proposals for new developments

Implementation of the changes adopted last year

➤ New loading tools:

- ✓ Documents (PDF, WORD, Images...)
- ✓ Links with relevant web sites

➤ Database restructuring

- ✓ Adding new Items: LNG, TPA, Kyoto Protocol
- ✓ Removing outdated items

Improvement of the web site

- Unit converter
- Photo gallery
- Archives

Update of the database

- Two Technical Committee Meetings
 - 10 datasets were updated
 - One created (UK)
- A new mini-site: UNCMS report

Proposals for new developments

- Extending and updating the contents of the database (business as usual)
- Continuation of the restructuring process
- Improving the existing tools and developing new tools

2006 Work Plan

Updating the database

- New data sets will be created:
 - Switzerland
 - Serbia.
- Two new mini-sites will be set up:
 - One related to LNG, (theme of the next high level meeting)
 - One presenting the works of the new Task Force on Infrastructures.
- Two technical committee meetings will be held:
 - June 21-22 2006
 - November 15-16 11 2006

Continuation of the restructuring process

- Simplified energy balances

Improving the web site tools

➤ Improvement of the query tool

- Input more flexible
- Output in reusable formats (I.e.Excel)

➤ Improvement of the search tool

- Extending the scope of the search (all the documents, not only the database)
- Adding a semantic dimension (synonyms, relationships...)

Thank You for your attention
