Regional cooperation on energy for sustainable development

OLADE Mission

Our mission is to contribute to the *integration*, sustainable development and energy security of the region by advising and *promoting cooperation* and *coordination* among the Member Countries.

Partnerships and multi-stakeholder collaboration

- No prescribed fast track recipes to promote regional and international collaboration among agencies.
- Coordination appears when it is needed.
- The path is made when walking.
Today example!!!
- There were the request for a better coordination between the regional agencies.

Partnerships and multi-stakeholder collaboration

- ECLAC, ARPEL, CAF, CIER, OEA, WEC-LAC, IADB and OLADE are working much more coordinating their agendas avoiding overlapping and looking for synergies.
- We have established a coordinating body that called the *Regional Energy Agenda*.

LANZAMIENTO DEL PROGRAMA REGIONAL DE EFICIENCIA ENERGÉTICA: HACIA UNA NUEVA AGENDA ENERGÉTICA REGIONAL

En el marco de la iniciativa "Hacia una Nueva Agenda Energética para la Región", en el que aúnan esfuerzos ALADI, ARPEL, CAF, CEPAL, CIER, OEA, OLADE y WEC, se abordó la necesidad de desarrollar un trabajo conjunto para disponer de un Programa Regional de Eficiencia Energética cuyo objetivo principal es promover el desarrollo del mercado de proyectos de eficiencia energética en América Latina.

En una primera fase de esta iniciativa se obtuvieron estudios de análisis del sector energético Latinoamericano y del Caribe y su inserción en el contexto mundial, dando como resultado un diagnóstico del estado actual e identificación de temas claves para la región en materia energética.

Partnerships and multi-stakeholder collaboration

- Joint report: *Identification of strategic projects for regional energy security* (PRESER) for the countries of South America. Financed by CAF.
- During the Energy Week we are presenting a *study on EE trends and policies* in LAC carried out in collaboration with the *IADB and ECLAC*.
- We are also presenting in coordination with *IADB and the ARE (Alliance for Rural electrification)* a report on Rural Electrification including our case studies and policy recommendations.
- With ECLAC, IEA and CIER: new information modules into our *Regional Energy Information System*
- A prospective analysis study and workshops for strengthening the capacity of Central America in the development of sustainable energy policies.
- Participation in the JODI Initiative providing information.

Agenda Energética Regional

Partnerships and multi-stakeholder collaboration

- Another area of collaboration is the possibility of sharing codes of energy related software and apps. We are implementing a GITHUB based platform where the countries will share their software codes as a kind of south-south cooperation.
- No recipes for collaboration. It is a matter to start with on going activities based on actual needs.
- Scarcity of resources and staff and the need for optimize them are probably the main drivers for consider coordination.
