Friedhelm H. Wannagat

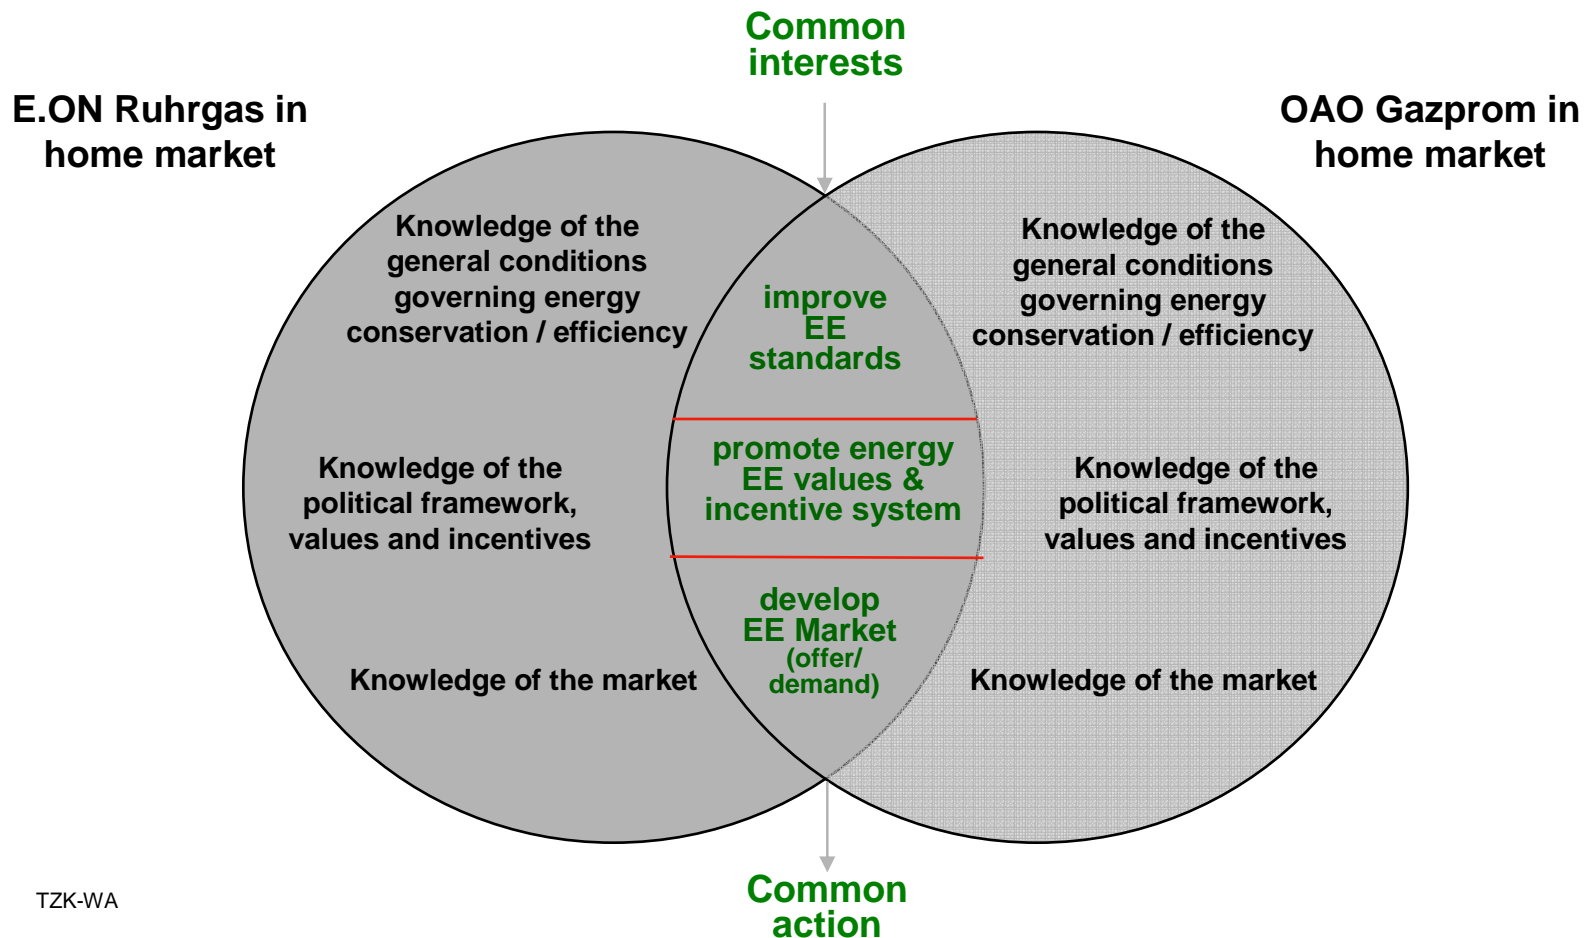

E.ON Ruhrgas AG
Head Technical Cooperation Eastern Europe
Essen / Germany

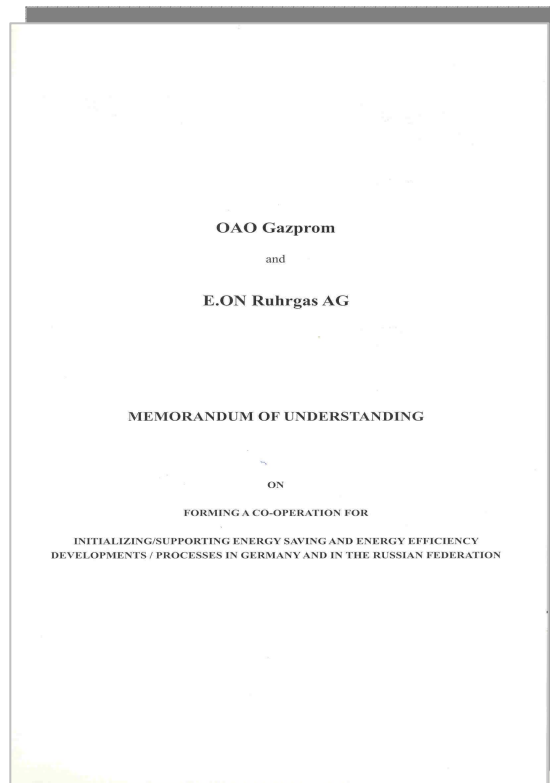

**20th Session of the
EE21 Steering Committee
June 3, 2009 / Geneva**

**Effective border crossing collaboration
promotes Energy Saving and Efficiency**

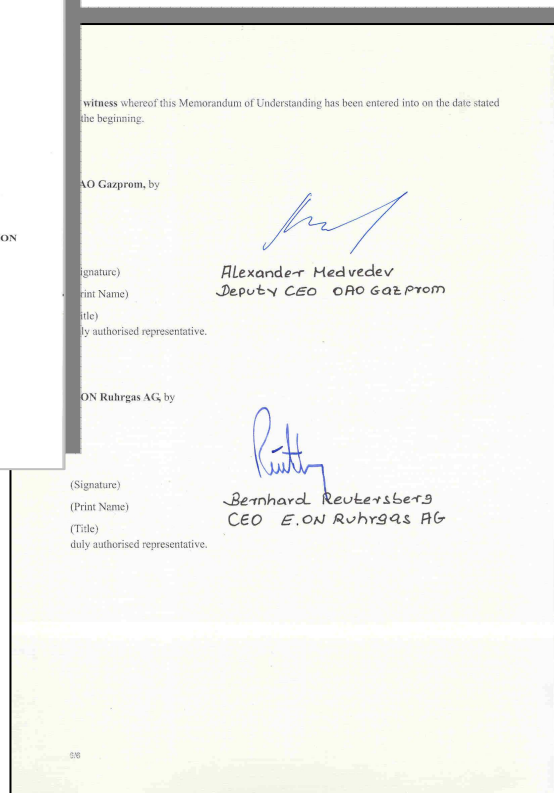

individual experiences + common interests = common action

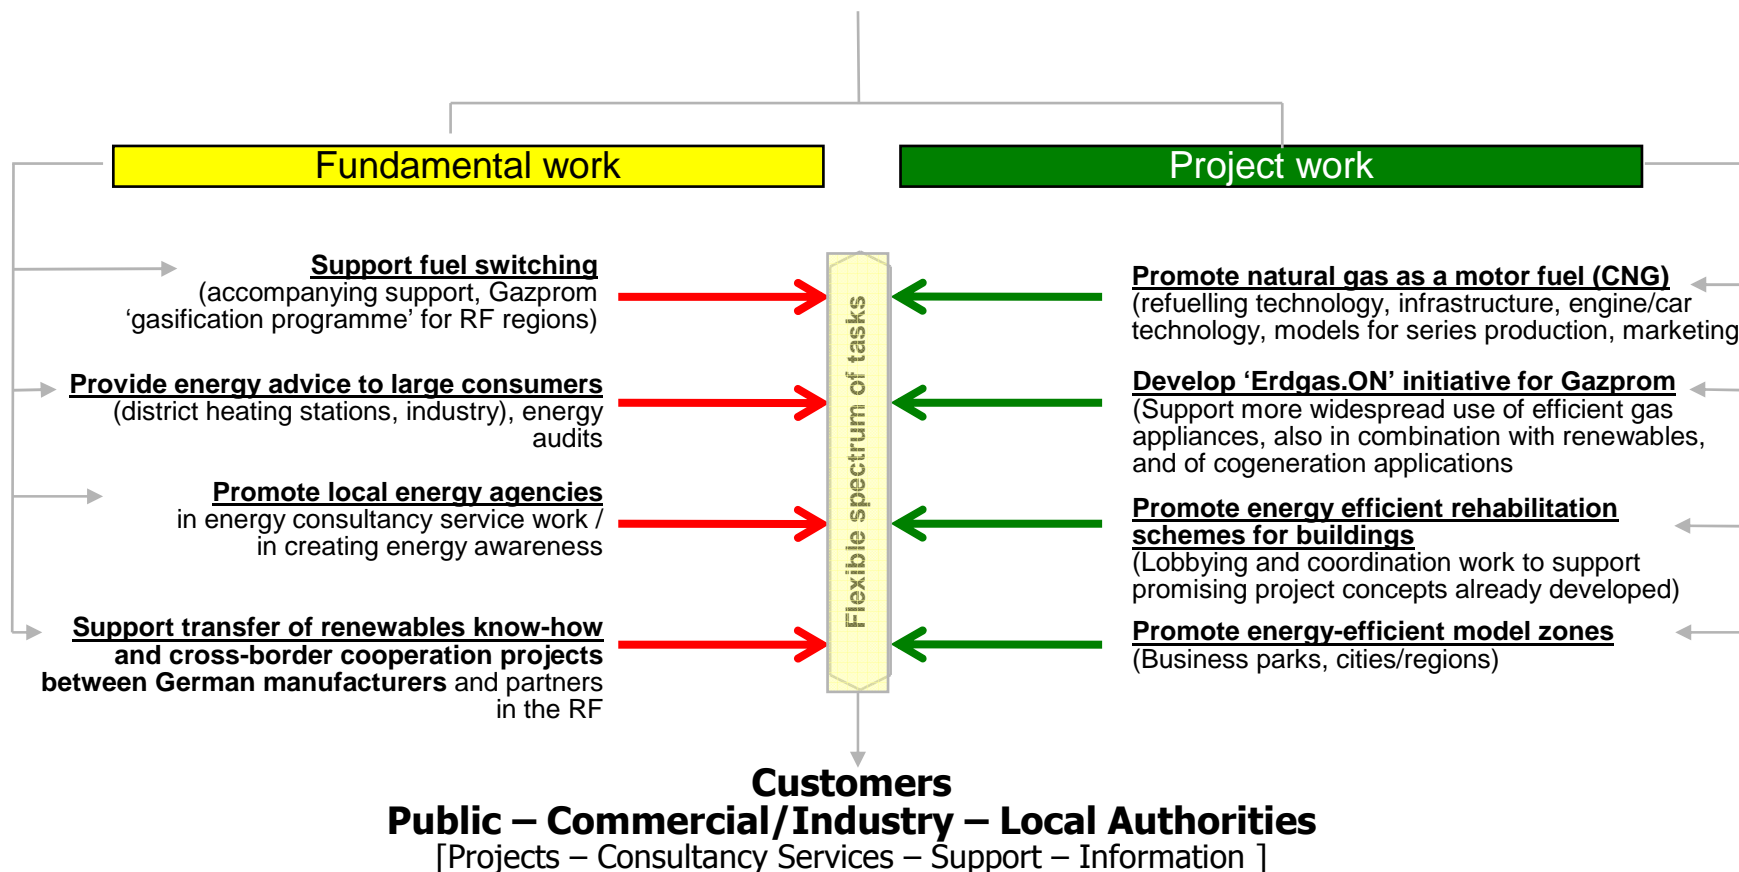

**“Initializing/Supporting Energy Saving
and Energy Efficiency Developments /
Processes in Germany and in the Russian
Federation”**

**Memorandum of Understanding
Munich / 30 Oct. 2008**

portfolio range / common action

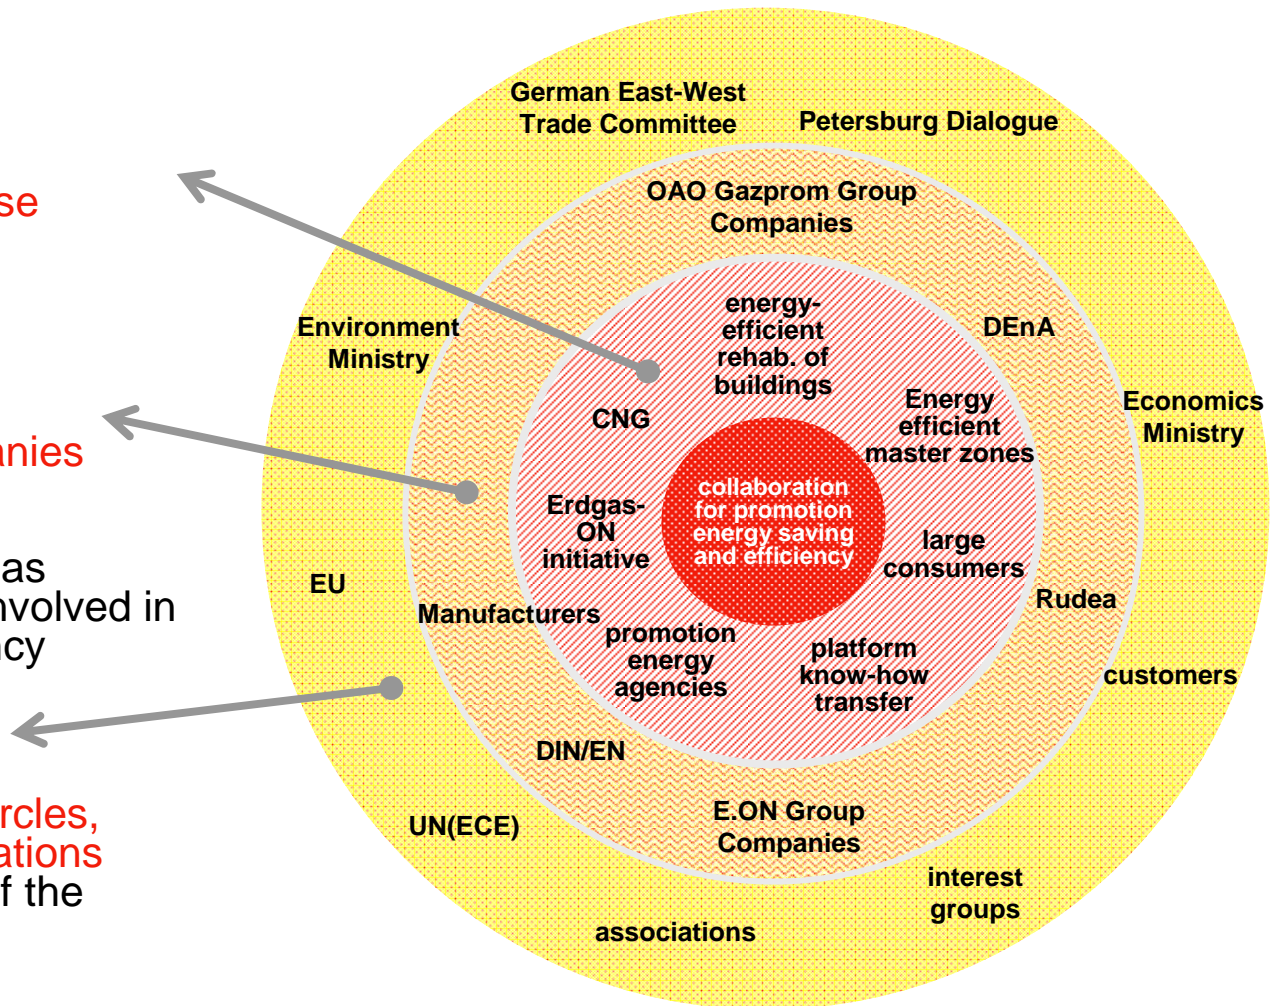

Approach

- Long-term nature
- Clear recognition value
- Noticeable economic/political/social impact
- **Partnerships** at all levels: public / politics / industry

Generation / Development of Projects to Promote Energy Saving and Energy Efficiency”

Integrated approach

- starting basis
 - our comprehensive expertise in all relevant natural gas technology areas
- active involvement
 - of all relevant group companies on both sides
 - of all external groups such as manufacturers interested involved in Energy Saving and Efficiency
- communication
 - with the relevant political circles, interest groups and associations while also taking account of the interests of our customers

Framework concept

- **Develop network of self-financing projects and supported initiatives** across **all economy areas** [local authorities, private end users, commercial and industrial customers, housing sector, commercial and passenger vehicles]. Starting point: district heating stations, large industrial consumers, facilities of high social value run by local authorities (schools, etc.)
- Develop concept for the individual projects with **a high level of general applicability**; achieve high multiplier effects with limited effort
- **Promote general energy awareness and consumer behaviour**; Campaigns and cooperation with regional/local energy agencies

Shape of planned Action:

- Module 1 / **Acquire key industries**, large public consumers / special focus on district heating stations / grids
- Module 2 / Support development of **energy-efficient model zones**
- Module 3 / Promote use of **CNG** by commercial and passenger vehicles
- Module 4 / Promote **energy-efficient rehabilitation concepts for buildings**
- Module 5 / Integrate **renewable energies**
- Module 6 / Develop/run **platform for the transfer of know-how** between West and East
