Current state of data collection and availability

Workshop on data solutions for evidence-based policy and stakeholder Collaboration
• Legal framework and planned changes
• Data Types
• Data Processing and Formats
• Challenges and Opportunities
Legal framework and planned changes

- **Georgian Law on Energy and Water Supply**
  - Market participants shall submit data to the GNERC

- **GNERC’s Resolution on Approving of Rules of Licensing and Activity Control in the Electricity, Natural Gas and Water Supply Sector:**
  - Licenses are required to report on fulfilling licensing requirements every year between 1 April to 1 May.
  - Activity report on previous year (technical and financial)
  - Next year activity and Investment plan

**GNERC’s Resolution on Energy Markets Monitoring Rules (after 01.01.2020)**

- Market monitoring activities by GNERC
- Procedures for market participants to register and provide reporting forms for each activity
Data Processing and Formats

- Validation
- Cross-checking
- Classification
- Summarization
- Aggregation
Challenges and Opportunities

- Standardize reports in electricity, natural gas and water sectors
- Annual reporting to be harmonized with tariff application process
- Establish online database and reporting platform
- Harmonize data forms with EU standards (Eurostat)
- Put in practice market monitoring indices
Thank You

Nikoloz Sumbadze
Deputy Head of Electricity Department at GNERC
