Feedback on China-Ukraine Workshop on Resources Classification: Status, Mapping & Application

中乌矿产资源储量分类实践国际研讨会报告

G.I. Rudko, YANG Hua

April 29, 2016, Geneva
During the 6th EGRC meeting, with the Bureau and Communications Sub-Committee (CSC)’s helpful guidance and supports, China and Ukraine delegations held a meeting in Geneva on 29 April 2015, and dedicated the organizational issues for a China-Ukraine Workshop on Resources Classification in Beijing, China. In the meeting two delegations agreed the Themes and Agenda of the Workshop.

The Workshop was listed as an Education and outreach activities of the CSC, and included into the work plan 2015-2016 of the EGRC.

June 2-3, 2015, China-Ukraine Workshop, sponsored by RIPED, CNPC, has been held in achieved a great success.
China–Ukraine Workshop on Resources Classification: Status, Mapping and Application

OUTLINE

I. Workshop Targets
II. Theme and Topics
III. Education & Outreach Activities
IV. Workshop Highlights
V. Summary
I. WORKSHOP TARGETS

High level technical exchange and discussion on the studies and application experiences of international classification systems, UNFC 2009, PRMS, CRIRSCO and as well as their mapping with Ukraine and China national classifications.

High level conversation and dialogue on the government policy in the management of mineral resources at the national and international levels, as well as in the industry processes management of exploration and mining operations, processes planning and efficient investment.

Further collaboration between China and Ukraine in the improvement of national mineral resources classifications in order to harmonize them to the UNFC-2009 and promote UNFC serving as a tool for harmonization of classifications in force.
II. THEME AND TOPICS

**Theme:** Resources Classification: Status, Mapping and Application

**Main Topics:**
- Comparison and mapping national classifications to UNFC, PRMS, CRIRSCO;
- Government view: experience and perspective on national resources classification;
- Advanced technologies: economic-geological evaluation technology, professional knowledge service system, Information Support, and so on;
- Classification systems application Case Studies: petroleum (particularly unconventional ones), solid mineral, and uranium deposits;
- National mineral resources policies.
III. EDUCATION & OUTREACH EVENTS

Target: Disseminate resources classification knowledge and promote the harmonization of national classifications to UNFC-2009.

Two Course:

- Course 1: The Age of Big Data
  Monday, 1 June 2015, 9:00-12:00
  Lecturer: Chen Ling

- Course 2: Major Resources Classification Systems in the World and New Updates
  Thursday, 4 June 2015, 9:00-12:00
  Lecturer: Georgii Rudko, Yang Hua,

8. Pre-workshop Training Course: The Age of Big Data
A public lecture was delivered by Georgii Rudko, and provided the youth in RIPED a good opportunity to understand the new updates on the major resources classification system in the world and the strategy considerations and experience achieved in Ukraine.
IV. WORKSHOP HIGHLIGHTS

10. Achieved Faithful Friendship

Friendship (II)
The Workshop was held at an extremely high level and very successful, and has met all goals designed in UN-EGRC’s 2015-2016 Work-Plan.

Both Ukraine and China delegations dedicated and shared their admirable expertise and greatly promoted the international communication between Ukraine and China in issues of mineral resources management, industry practice experience in classification systems and also issues of the UNFC mapping and applications, and consequently provided an opportunity for leading experts of Ukraine and China to consider the existing problems and offer solutions on important matters regarding the classification systems of mineral reserves and resources.

The Workshop promoted the high level communication between China and Ukraine, and laid a solid foundation for the long-term cooperation on common interests of both sides and for further increase of the collaboration achievements.
Thank You For Attention,
Welcome to RIPED!
