Cross-cutting Issues and interlinkages between CSD themes

Keynote Address

Fourth UN ECE Regional Implementation Meeting
on Sustainable Development

Palais des Nations – 1er-2 Décembre 2009

*Nadine Gouzée, Member of the Federal Planning Bureau – Belgium
Head of the Task Force on Sustainable Development*

THE MAIN CROSSCUTTING ISSUES ARE
the 3 overarching SD objectives re-affirmed in JPOI § 2

Poverty eradication
(especially in developing countries)

Protection and sustainable management
the natural resources
(within the ecosystems carrying capacity)

Changing unsustainable consumption and production patterns
(the lifestyles of present populations should not hinder future generations to meet their own needs)

Consumption, production and demography are key components of economic growth

Demography

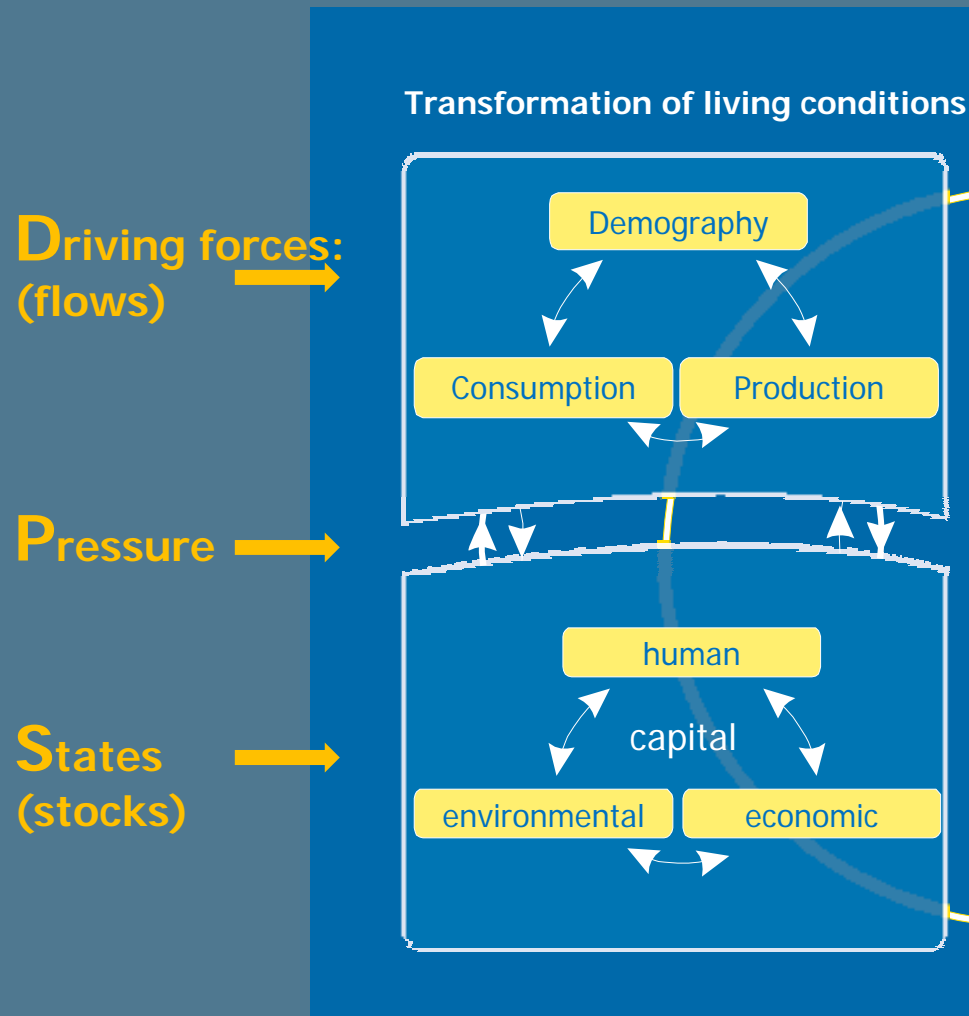

Consumption

Production

Growth, resulting from the interactions between Consumption, Production and Demography exert impacts, positive and negative, short term and long term impacts on the development of all countries.

Impact of growth on the evolution of the resource base for development :

Need of Policy incentives and responses to repair the degradations and improve the State of our resources, as well as to improve the Driving forces

Structure: TransGovern model
