

# **Economic Commission for Europe**

## **Committee on Environmental Policy**

### **Twenty-first session**

Geneva, 27–30 October 2015

Item 7 (b) of the provisional agenda

### **Cross-sectoral activities: environment and security**

Information paper No. 5

22 October 2015

## **United Nations Economic Commission for Europe activities in the framework of the Environment and Security Initiative**

### **Note by the secretariat**

#### *Summary*

The Environment and Security Initiative (ENVSEC) aims to reduce security risks and increase cooperation on the management of natural resources and environmental threats in the Caucasus, Central Asia and Eastern and South-Eastern Europe.

The present paper provides a brief overview of the Initiative, as well as a summary of UNECE ongoing activities carried out under ENVSEC.

The Committee on Environmental Policy may wish to consider the information provided.

## **I. The Environment and Security Initiative**

1. Shared natural resources, including transboundary waters, arable land, pastures and forests, open pathways for enhanced cooperation and confidence building. Environmental problems ignore political boundaries and call for cooperation among countries including Parties to the multilateral environmental agreements (MEAs) in order to sustainably manage limited natural resources. Joint environmental monitoring programmes, international river basin management, dam safety initiatives and environmental impact assessments are some examples of how environmental initiatives can increase dialogue and strengthen cooperation.

2. The Environment and Security Initiative (ENVSEC) is a partnership that supports the development of cooperation and confidence building through concrete projects that develop capacity across the United Nations Economic Commission for Europe (UNECE) region. Established in 2003, ENVSEC provides a platform for regional cooperation on assessing and addressing environmental challenges. The partnership consists of five international agencies: the Organization for Security and Co-operation in Europe (OSCE), the United Nations Environment Programme (UNEP), the United Nations Development Programme (UNDP), UNECE and the Regional Environment Center for Central and Eastern Europe (REC-CEE).

3. All ENVSEC projects are agreed among the partners, in cooperation with the concerned Governments or Parties to MEAs, and when necessary, in consultation with national experts and non-governmental organizations. Key elements in the project selection include: identifying hotspots for rising tensions over environmental resources; strengthening policies, awareness and participation; building capacities and frameworks to prevent and address environmental problems; supporting coordination and concrete actions at country and regional level; providing solutions for safe environment and sustainable development; and mobilizing financial support and technical expertise for environmental clean-up and remediation.
4. Representatives from each of the ENVSEC partners make up the ENVSEC Management Board, which has a rotating Chair and a joint Secretariat, to administer projects and their assessment. UNEP is currently serving as Chair of the Initiative. The ENVSEC Secretariat is hosted by UNEP (Geneva) and consists of the Coordinating Unit, representatives of each partner organization and Regional Desk Officers (RDO) for each of four sub-regions (the Caucasus, Central Asia, Eastern and South-Eastern Europe).
5. ENVSEC supports the development of regional programmes to respond to regional priorities identified in a consultative process with national counterparts. The regional programmes which comprise of a number of individual projects, contribute to the overall ENVSEC goal.
6. Through implementation of the regional programmes, ENVSEC encourages its stakeholders to coordinate and participate actively in the achievement of national objectives according to regional contexts and priorities, and ensures greater impact of their initiatives. This approach allows donors to support one or several ENVSEC programmes or distinct projects, in line with their own priorities and special interests. ENVSEC regional programmes serve as mechanisms for creating and sharing knowledge and experiences on a multi-country and multi-stakeholder basis.
7. The ENVSEC Secretariat works closely together to coordinate activities, report periodically on progress made and share experience for an optimal functioning of the Initiative across the different regions.
8. Key results achieved by the ENVSEC partners over the past few years include:
  - (a) Improved monitoring, information exchange and cooperation on environmental risks in several transboundary river basins;
  - (b) Strengthened legal, institutional and administrative capacity to carry out environmental impact assessment and strategic environmental assessment for managing security challenges of transboundary nature;
  - (c) Enhanced stakeholders' dialogue and access to information in relation to projects with transboundary environmental impacts;
  - (d) Remediation solutions for hazardous mining sites and the elimination of hazardous chemicals such as obsolete pesticides and rocket fuel;
  - (e) Strengthened regional coordination and capacities for radioactive waste management (e.g. uranium) and affected site rehabilitation;
  - (f) Improved policies and regulations on environmental challenges such as dam failures, illegal logging and wildfires;
  - (g) Increased regional coordination on adaptation to the impacts of climate change in transboundary basins;
  - (h) Increased awareness and participation of civil society in decision making at local level; and

- (i) Strengthened capacities in the area of industrial accident prevention, preparedness and response.

## II. The Environment and Security Initiative: regional overview

## III. Multilateral environmental agreements and the Environment and Security Initiative

9. MEAs administered by UNECE are an important pillar of ENVSEC's activities and provide a value-added to the partnership. ENVSEC supports the implementation of several MEAs and enables UNECE to implement activities on the ground, in cooperation with ENVSEC partners. A list of ENVSEC projects involving UNECE is found in the annex to this paper.

10. The Convention on the Protection and Use of Transboundary Watercourses and International Lakes (Water Convention) is an important legal and intergovernmental framework for cooperation on transboundary freshwaters, requiring Parties to prevent, control and reduce transboundary impact, use transboundary waters in a reasonable and equitable way and ensure their sustainable management. ENVSEC projects play a prominent role in the Convention's programme of work. There are several examples of projects supporting the development of transboundary cooperation in specific basins (Drin, Kura, Dniester, Aral Sea basin). Most of the Convention's pilot projects on water and adaptation to climate change in transboundary basins are funded and implemented under ENVSEC, for example on the Dniester, Neman and Chu-Talas.

11. The Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention) and its Protocol on Strategic Environmental Assessment (Protocol on SEA) provide legal obligations and institutional frameworks for addressing environmental

and health risks of economic activities and for improving transboundary cooperation. Pilots and capacity building projects implemented with ENVSEC partners contribute to effective national and regional application of these instruments. Examples include legislative reviews and post project-analysis of the exploitation of the Khotislavskoye quarry conducted in Belarus and Ukraine in 2013–2014. A joint project with the UNECE Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters (Aarhus Convention) to promote SEA, transboundary environmental impact assessment and public participation in Caucasus was approved by the ENVSEC management board in late 2014, but its implementation has been delayed pending identification of donor funding.

12. The Convention on the Transboundary Effects of Industrial Accidents (Industrial Accidents Convention) promotes active international cooperation between countries, before, during and after an industrial accident. The Assistance Programme of the Industrial Accidents Convention benefits from cooperation with ENVSEC partners in sub-regions such as Eastern and South-Eastern Europe.

13. The (Aarhus Convention and its Protocol on Pollutants Release and Transfer Registers (Protocol on PRTRs) promote effective engagement of the public in decision-making, providing a comprehensive framework for Governments to ensure transparent and accountable governance and democracy in environmental matters. Cooperation with ENVSEC reinforces countries' capacities for implementation of both instruments. Furthermore, ENVSEC partners, such as OSCE, are engaged in strengthening Aarhus Centres in regions where ENVSEC is active. Significant progress has been made in strengthening capacity of institutions and integrating the Aarhus Convention into national legislation in Belarus.

#### **IV. The Environment and Security Initiative: challenges and priorities**

14. Challenges and priorities for the future development of ENVSEC include:
- (a) Further developing cooperation and synergies between ENVSEC partners;
  - and
  - (b) Improving financial sustainability and broadening of the donor base.

Current main donors are Austria, Finland, Sweden, Switzerland and the European Union. The ENVSEC portfolio presently includes 150 projects with a budget of about US\$ 60 million. A number of new projects under the ENVSEC thematic focus areas have been developed and fundraising is presently on-going.

## Annex

### List of selected ENVSEC projects with the involvement of or linked to the UNECE MEAs

#### I. ENVSEC projects under the Water Convention

1. ENVSEC projects under the Water Convention in cooperation with other agencies include:

(a) Capacity building for cooperation on dam safety in Central Asia (Phase III), completed in 2014 (with activities now implemented outside ENVSEC);

(b) Ratification of the Water Convention in Georgia and development of an agreement on the management of transboundary watercourses shared by Georgia and Azerbaijan (completed, with continued support provided towards the final negotiation and signature of the agreement);

(c) A project on the Drin River, shared by Albania, Greece, the former Yugoslav Republic of Macedonia, Kosovo (United Nations administered territory under the United Nations Security Council resolution 1244) and Montenegro aiming to improve transboundary cooperation in the basin, completed in 2014;

(d) Pilot projects on water and adaptation to climate change in transboundary basins:

(i) Testing of the Guidance document developed under the Water Convention - Climate change adaptation and transboundary flood risk management in the Sava River Basin, completed in 2013;

(ii) Reducing vulnerability to extreme floods and climate change in the Dniester River basin (Dniester III Flood and Climate); followed by the project "Climate change and security in Eastern Europe, Central Asia and the Southern Caucasus - climate change adaptation in the Dniester basin", completed in 2014;

(iii) Adaptation to climate change in the Chu-Talas river basin;

(iv) River basin management and adaptation to climate change in the Neman river basin.

2. Future planned project (without confirmed funding) include:

(a) Dniester River Basin Project;

(b) Project on river basin management and adaptation to climate change in the Neman River Basin (phase II);

(c) Support for the Management of Transboundary Watercourses shared by Georgia and Azerbaijan;

(d) Transboundary climate change adaptation in the Alazani/ Ghanik basin.

## **II. ENVSEC projects under the Espoo Convention**

1. ENVSEC projects under the Espoo Convention in cooperation with other agencies include:

(a) Joint environmental monitoring, assessment and exchange of information for integrated management of the Danube delta region (Phase II) (on-going, led by UNEP, with involvement of the Espoo Convention Secretariat completed);

(b) Development of capacities for application of the Espoo Convention in Eastern Europe (Belarus) with participation of Lithuania (completed in 2011);

(c) Training and capacity development for reaching EU standards and multilateral Conventions; monitoring, pollution prevention and control, EIA and permitting, etc. (in South-Eastern Europe, led by REC-CEE, with involvement of the Espoo Convention Secretariat completed);

(d) Strengthening implementation of the Espoo Convention in Azerbaijan (completed in 2013);

(e) Capacity building workshop on the implementation of the Espoo Convention in the Caucasus (Tbilisi, May 2011);

(f) Pilot project in Belarus and Ukraine on post-project analysis of environmental impact in a transboundary context and technical advice and training on strategic environmental assessment in Belarus (implemented with UNEP and UNDP and completed in 2014).

2. Future planned project (without confirmed funding) include:

(a) A joint capacity building project with the UNECE Aarhus Convention to promote SEA, transboundary environmental impact assessment and public participation in Caucasus is in the pipeline (the project document was approved by the ENVSEC Management Board in late 2014).

## **III. ENVSEC projects under the Industrial Accidents Convention**

1. ENVSEC projects under the Industrial Accidents Convention include:

(a) Capacity-building workshop to enhance development and evaluation of safety reports in Croatia (October 2013);

(b) National training session on safety management systems as part of safety reports in Serbia (November 2013);

(c) Capacity building workshop on preparation and evaluation of safety reports in the former Yugoslav Republic of Macedonia (February 2014);

(d) Comparative analysis of the hazard and crisis management legislation, policy and institutions in the Republic of Moldova, Romania and Ukraine, completed in 2014);

(e) Capacity building workshop on the implementation of the Convention in Montenegro (Podgorica, May 2014).

2. Future planned project (without confirmed funding) include:

(a) Strengthening industrial safety and transboundary cooperation in Eastern Europe (approved by the ENVSEC Management Board in November 2014);

(b) Support to Georgia for accession to the Convention on Industrial Accidents and strengthen Convention's implementation in the South Caucasus.

#### **IV. ENVSEC projects under the Aarhus Convention**

1. ENVSEC projects under the Aarhus Convention in cooperation with other agencies include:

(a) A number of Aarhus Centres are being established and supported by ENVSEC partners such as OSCE (ongoing);

(b) Strengthening the implementation of the Aarhus Convention and promoting its Protocol on PRTRs in Belarus (2013–2016, ongoing);

(c) Strengthening access to justice in environmental matters in South-Eastern Europe (completed in 2014).

2. Future planned project (without confirmed funding) include:

(a) Strengthening Public Participation in Decisions on the Deliberate Release into the Environment and the Placing on the Market of Genetically Modified Organisms in the selected countries of the Caucasus, Central Asia and Eastern and South-Eastern Europe.
