Item 11 (a) of the provisional agenda

Programme of work of the Environment subprogramme:

biennial performance plan of the Environment

subprogramme in 2014–2015

Biennial performance plan of the Environment subprogramme for 2014–2015

Note by the secretariat

Summary

The Executive Committee of the Economic Commission for Europe (ECE) has requested that the work of the ECE subprogrammes be evaluated on a biennial basis (E/2004/37–E/ECE/1416, para. 28 (c)). As of June 2014, the cluster-based biennial performance assessment known as the biennial evaluation report became discretionary for the ECE subprogrammes, per a new ECE evaluation policy. In the light of this change, the Committee on Environmental Policy (CEP) will be invited to consider whether it wishes to continue with the biennial performance assessment for the Environment subprogramme.

Should CEP decide to continue with the biennial performance assessment, it will be invited to approve the biennial performance plan of the Environment subprogramme for 2014–2015, presented in the current document, which contains the following amendments to document ECE/CEP/2013/4 previously approved in 2013:

(a) The new title of the document is “Biennial performance plan of the Environment subprogramme for 2014–2015”;

(b) It includes two additional indicators of achievement under the Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention) cluster of activities. The indicators were proposed by Lithuania (on behalf of the European Union member States) at the last session of CEP, with a view to measuring:

(i) The number of Parties that have ratified, approved or accepted the Espoo Convention;

(ii) The number of Parties that have ratified, approved or accepted the two amendments to the Espoo Convention.

I. Introduction

1. The Environment subprogramme of the United Nations Economic Commission for Europe (ECE) has four overarching expected accomplishments in the strategic framework for 2014–2015 (A/67/6 (Prog. 17)). It will report on their implementation to the General Assembly of the United Nations.
2. The activities in the Environment subprogramme for the biennium 2014–2015 are grouped into clusters of activities. It will report on their implementation to the Committee on Environmental Policy.
3. The table below presents expected accomplishments and indicators of achievement for the biennium 2014–2015 for each of the clusters grouping the subprogramme's activities. The left column contains the four overarching expected accomplishment as included in the strategic framework for 2014–2015. The middle column contains the clusters of activities. The right column presents the expected accomplishments and indicators of achievement, as well as performance measures for each of the clusters. The table is structured in such a way as to show the correlation between the ECE strategic framework and the cluster framework used for subprogramme biennial evaluation for 2014–2015.

^a The amendments to the Water Convention opening it to accession by all United Nations Member States came into force in February 2013 and are expected to become effective operationally at the end of 2013, once all Parties that were Parties to the Convention when the amendments were adopted have ratified the amendments.

^b This cluster is expected to be discontinued from the Environment subprogramme in the light of decision taken by the Rio+20 Conference to replace CSD by a high-level political forum.
