

## **COMPLIANCE WITH REPORTING OBLIGATIONS**

### **Note by the secretariat**

This document contains information referred in the report on the review of compliance by Parties with their reporting obligations in 2017 (see para. 19, ECE/EB.AIR/2017/5). This information provided the basis for the Committee's evaluation of compliance by Parties with their obligations to report on emission data.

The document presents the status of emission data reporting as of 30 August 2017 and contains seven tables reflecting reporting under the seven Protocols in force: the 1985 Sulphur Protocol, the Protocol on Nitrogen Oxides (Protocol on NO<sub>x</sub>), the Protocol on Volatile Organic Compounds (Protocol on VOCs), the 1994 Protocol on Sulphur, the Protocol on Heavy Metals, the Protocol on Persistent Organic Pollutants (Protocol on POPs) and the Protocol to Abate Acidification, Eutrophication and Ground-level Ozone (Gothenburg Protocol). . In addition, it contains a table reflecting reporting on large-point sources (LPS) data under the Convention. The tables were prepared by the secretariat in cooperation with the EMEP Centre on Emission Inventories and Projections (CEIP).

The "X's" in the tables refer to the submission of national totals for each Party that submitted data to CEIP (and notified the secretariat about their submission). Tables 1 to 3 indicate whether Parties have reported national totals for the pollutant required under the Protocols they are Party to (and data for the Tropospheric Ozone Management Area (TOMA) in the case of Norway under the Protocol on VOCs). Tables 4 to 7 indicate whether Parties have reported on time ("XT") in the latest reporting round. Additionally to national totals, these tables also show gridded data for the pollutant required under the respective Protocol. Table 3 shows gridded VOCs emission data. Table 4 shows reporting for national total and gridded SO<sub>x</sub> emission data. Table 5 shows reporting for total and gridded PAHs, Dioxin/Furans, HCB emission data - the three POPs for which Parties to the Protocol have emission reduction obligations. Table 6 shows total and gridded emission data for the priority metals Cd, Pb and Hg under the Protocol. Table 7 shows reported national total and gridded emission data under the Gothenburg Protocol for SO<sub>2</sub>, NO<sub>x</sub>, VOCs and ammonia. National total emission data is presented on the basis of 'fuel sold' and 'fuel used' for those six countries that may choose the 'fuel used' option for compliance purposes and are Party to the Protocol<sup>1</sup>. Additionally, Table 7 also presents data on projection reporting under the Gothenburg Protocol for the years 2020, 2025 and 2030. Table 8 reflects reporting of LPS data as outlined in the Guidelines for Reporting Emissions and Projections Data under the Convention (ECE/EB.AIR/125).

---

<sup>1</sup> These six countries are: Belgium, Lithuania, Luxembourg, the Netherlands, Switzerland and the United Kingdom.

## STATUS OF EMISSION DATA REPORTED BY PARTIES TO THE PROTOCOLS

**Table 1:**  
**Emissions reported by Parties to the 1985 Protocol on Sulphur**

	Party	Base year	2010	2011	2012	2013	2014	2015

**Thirty-seventh session of the Executive Body  
Convention on Long-range Transboundary Air Pollution  
Informal Document 1**

X <sup>T</sup>	Data received on time, i.e. by 15 February for	X	gridded data received in 50x50 km <sup>2</sup> resolution										
X	Data received late (only for the current report)	X <sup>x</sup>	gridded data received (also) in 0.1°x0.1° (long-lat) resolution										
-	No data received (or blank cells in the report)	n/a	Reporting obligation not applicable										
n/a	Reporting obligation not applicable	-	No data received										
*	The value reported under projections is the national total value for the entire territory, which is based on fuel sold. Only the United Kingdom report the projected value based on fuel used.												
	Parties to the Gothenburg Protocol within the geographical scope of EMEP shall regularly update their projections and report every four years from 2015 onward their updated projections, for the years 2020, 2025 and 2030.												
**	Party outside the geographic scope of EMEP												
***	Obligations for EU28 are included under the revised GP. The EU reports annual data for EU 28 in its NFR. Gridded data are for EU27.												
****	In the total only the provision of data indicated as "X" or "XT" is counted. The absence of data indicated with "-" and the provision of notation keys are counted as "not reported".												
	EU-15 has not been considered as part of the Total.												
	According to the guidelines there are 8 countries that can report emissions on the basis of fuel used for compliance purposes under the GP;												
	6 of these are Parties to the Protocol and are indicated in blue above; the non-submission of "fuel used" data does not indicate a case of non-reporting												
	The US has obligations under the GP for PEMA's instead of the entire territory; see below for the difference in PEMA's per pollutant												
SO <sub>x</sub>	48 contiguous United States and District of Columbia (indicative ceiling)												
NO <sub>x</sub>	Connecticut, Delaware, the District of Columbia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia, and Wisconsin (indicative ceiling)
