SUSTAINABLE DEVELOPMENT GOAL 6:
ENSURE ACCESS TO WATER AND SANITATION FOR ALL
Supporting progress towards SDG 6
Focus on Targets 6.1, 6.2 and 6.3
Our organisation
Presentation

- a French non-profit organisation (law of 1901)
- created in 1984
- Aims to support stakeholders from the WASH sector in their efforts in providing the populations of developing countries with universal access to water and sanitation
pS-Eau is, and coordinates, a multi-stakeholders network that fosters the sharing of experiences and information between all stakeholders working for the water and sanitation sectors in developing countries.
Key facts

- Executive team: 17 members of staff
  France (Paris, Lyon), Senegal, Burkina Faso, Madagascar, Lebanon

- 100 member organisations in the network
  Stakeholders of the international aid and cooperation sectors
  Stakeholders of the French decentralized cooperation and non-governmental organisations

- +30 000 individual contacts worldwide
Three key areas of work

- Research and Development
- Support to the actors of the international aid and cooperation of the WASH sector, particularly, the francophone cooperation
- Promoting international solidarity mechanisms for water
Focus on Targets 6.1, 6.2 and 6.3
From MDGs to SDGs

- Participative design and adoption
- Interdependent thematic goals
- More ambitious goals
- Progressive implementation
- Water and sanitation services are directly addressed
- From an infrastructure to a service perspective
## Structure and principles

Goals > Targets > Indicators

### Targets

<table>
<thead>
<tr>
<th>Target 6.1</th>
<th>By 2030, achieve universal and equitable access to safe and affordable drinking water for all</th>
</tr>
</thead>
<tbody>
<tr>
<td>Target 6.2</td>
<td>By 2030, achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations</td>
</tr>
<tr>
<td>Target 6.3</td>
<td>By 2030, improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally</td>
</tr>
</tbody>
</table>

### Indicators

| Indicator 6.1.1 | Proportion of population using safely managed drinking water services |
| Indicator 6.2.1 | Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water |
| Indicator 6.3.1 | Proportion of wastewater safely treated |
| Indicator 6.3.2 | Proportion of bodies of water with good ambient water quality |

---

Ensure access to water and sanitation for all
Indicators: tools to assess progress

6.1.1: Accessibility, availability, and quality

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Safely managed</td>
<td>Drinking water from an improved source which is located on premises, available when needed and free of faecal and priority chemical contamination</td>
</tr>
<tr>
<td>Basic</td>
<td>Drinking water from an improved source provided collection time is not more than 30 minutes for a roundtrip including queuing</td>
</tr>
<tr>
<td>Limited</td>
<td>Drinking water from an improved source where collection time exceeds over 30 minutes for a roundtrip to collect water, including queuing</td>
</tr>
<tr>
<td>Unimproved</td>
<td>Drinking water from an unprotected dug well or unprotected spring</td>
</tr>
<tr>
<td>No service</td>
<td>Drinking water collected directly from a river, dam, lake, pond, stream, canal or irrigation channel</td>
</tr>
</tbody>
</table>

Service ladder for drinking water, with comparison between MDG and SDGs

MDG (2000-2015) - Improved water source
SDG (2015-2030) - Safely managed service
SDG target 6.1 - Safely managed service

Unimproved water source
Service not safely managed
6.2.1: Access is not-shared, treatment of excreta and handwashing facility

<table>
<thead>
<tr>
<th>Safely managed</th>
<th>Use of improved facilities that are not shared with other households and where excreta are safely disposed of in situ or transported and treated off-site and which include the presence of a handwashing facility with soap and water on the premises¹²</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic</td>
<td>Use of improved facilities that are not shared with other households</td>
</tr>
<tr>
<td>Limited</td>
<td>Use of improved facilities shared between two or more households, which would otherwise be considered basic or safely managed</td>
</tr>
<tr>
<td>Unimproved</td>
<td>Use of pit latrines without a slab or platform, hanging latrines or bucket latrines</td>
</tr>
<tr>
<td>Open defecation</td>
<td>Disposal of human faeces in fields, forests, bushes, open bodies of water, beaches or other open spaces, or with solid waste</td>
</tr>
</tbody>
</table>

**MDG (2000-2015)**
- Improved sanitation facilities

**SDG (2015-2030)**
- Safely managed service
  - Target 6.2

Sanitation service ladder, with a comparison between the MDGs and SDGs¹¹

¹¹Sanitation service ladder, with a comparison between the MDGs and SDGs
Indicators: tools to assess progress

6.3.1: Proportion of wastewater safely treated

\[
\text{Wastewater} = \text{Domestic wastewater (blackwater + greywater)} + \text{Wastewater from economic activities}
\]
Water and sanitation services are directly addressed in a number of SDG targets, the scope of which overlap.
This diagram shows how the various links in the water and sanitation services chain are taken into account by the first four targets of SDG 6 and by target 4.a. These targets are detailed in the following chapters.
Our support to help WASH stakeholders to understand and implement SDG6 targets
Providing information and training

- Guidebooks, studies
- Sharing information within the sector
- Thematic debates/meetings
- Training sessions / workshops
Providing support

- Supporting decentralised cooperation and non-governmental organisations
- Support to financial partners (involved in decentralised cooperation)
Facilitating local networks

- In partnership with local actors
- Gathering WASH stakeholders together in specific countries
  - Information and training
  - Providing support to stakeholders
- Providing support to national and local authorities
