Consultations regarding the need to revise the decision shall be held in accordance with the article of the nuclear power plant in Lithuania. We would like to note that, according to this article, the decision to apply Article 6.3 of the Espoo Convention for the construction of the nuclear power plant in Lithuania should be respected.

Having assessed the submitted information, we would like to note that the provided comments do not answer the questions raised by Lithuania and do not present new arguments regarding the normal operation of the nuclear power plant and the accident that occurred during the selection of a reactor site for construction of the nuclear power plant in Belarus.

We express our regret that the Republic of Belarus adopted subsequent decisions regarding the implementation of the nuclear power plant project in the Republic of Lithuania before the analysis of information on the construction of the nuclear power plant in the Belarussian Republic. We consider the implementation of the Belarussian nuclear power plant project in the Republic of Lithuania a subsequent decision regarding the construction of the nuclear power plant in the Belarussian Republic.

Dear Mr. Vytautas Klaška,

REGARDING NUCLEAR POWER PLANT PROJECTS IN BELARUS AND LITHUANIA

Belarus
