Green shipping in Norway

Eli Marie Åsen, Norwegian Ministry of Climate and Environment
Geneva, 30 January 2019
**Green Coastal Shipping Programme**

Vision:

"Norway establishes the world's most efficient and environmentally friendly coastal shipping, powered by zero- and low emission solutions"
A package of policy instruments to reduce emissions of NOx

• A tax on emissions of NOx (from 2007), including propulsion machinery >750 kW (ships, aircrafts, trains)
• Exempt from tax when committing to an environment agreement with the Government (2008-2025)
• The Business Sector's NOx Fund
Emissions of NOx in Norway
Integrated approach within the government

The Government

Ministry of Finance  Ministry of Petroleum and Energy  Ministry of Climate and Environment  Ministry of Trade, Industry and Fisheries  Ministry of Transport and Communications  Ministry of Local Government and Modernisation
Battery powered ferries
