## "GOOD PRACTICE" IN EDUCATION FOR SUSTAINABLE DEVELOPMENT IN THE UNECE REGION

"Good practices in ESD" are initiatives closely related to Education for Sustainable Development, that demonstrate good practice, generate ideas and contribute to policy development. These good practices:

1. focus on the educational and learning dimensions of sustainable development.
2. are innovative. They develop new and creative solutions to common problems, such as:
  - ❖ ways to discover what the key local issues of sustainable development are
  - ❖ ways to adapt processes to relevant teaching and learning strategies
  - ❖ ways of fostering links between learning situations and the community
  - ❖ ways of integrating local knowledge and culture
  - ❖ curriculum development processes enabling content to be decided as locally relevant
  - ❖ starting points on how Education for Sustainable Development can best be put into effect.
3. make a difference. They demonstrate a positive and tangible impact on the living conditions, quality of life of the individuals, groups or communities concerned. They seek to bridge gaps between different societal actors/sectors and are inclusive, in order to allow new partners to join the implementing agents/bodies.
4. have a sustainable effect. They contribute to sustained improvement of living conditions. They must integrate economic, social, cultural and environmental components of sustainable development and reflect their interaction/interdependency in their design and implementation.
5. have the potential for replication. They provide effective methodologies for transdisciplinary and multi-sectoral co-operation. They serve as models for generating policies and initiatives elsewhere.
6. offer some elements of evaluation. They have been and can be evaluated in terms of the criteria of innovation, success and sustainability by both experts and the people concerned.

***If you submit more than one "good practice", please indicate the priority 1, 2 or 3.***
