Lee/Keith,

I refer to my earlier email below dated 31st May 2012 requesting hard copies of all work that your section out carried during the processing of responses for planning application A/2008/0408/F. It is critical that we have this information on the planning file and that you scan/fax it to me at your earliest opportunity. As you are aware a series of questions have been tabled for the Minister and this information will form part of our response.

Regards,

Malachy

Hi Lee,

Further to our telephone conversation I am willing to clarify the information required by Planning:

1) Conditions-The Department needs clarification on conditions. In particular we need to know if NIEA have a condition in relation to the timing of any operational work that would be carried out for the construction of the new lagoons and de-commissioning of the existing lagoons. The River Faughan has protection in relation to Salmon and the Department would be keen to avoid any impact on key migration and spawning periods. We need also require a detailed phasing and method condition, which would clearly set out when and how the current lagoons would be de-commissioned and the proposed lagoons constructed. A re-consultation will be issued on EPIC today.

2) Appropriate assessment-Can we have a copy of the appropriate assessments and any addendums that were carried out in relation to the revised proposal? Can these be scanned and emailed to myself?

As you would appreciate we would keen to get this information as soon as possible so as to inform our decision making process.

Regards,

Malachy
