Subject: Additional information concerning Communication ACCC/C/2014/104 by the Netherlands

Dear Ms Marshall,

It was nice meeting you in person today.

As agreed during the discussion of the Communication, please find attached a version of the Opening Statement of the Netherlands as it was delivered.

I also attach the license application for the extension of the design lifetime of the Borssele NPP. The Dutch version is the complete application, relevant parts were unofficially translated in English. Appendix C of the application shows the amendments in the Safety Report which are highlighted in red.

Also attached is the screening on the significant adverse environmental effects that took place before the procedure on the extension of the design lifetime of the Borssele NPP started (in Dutch, the English translation will be sent tomorrow morning when I am back in the office).

I hope this information will be of use for the Compliance Committee. We will provide answers to questions that were put forward and our final comments at a later stage. I trust that any further information submitted by the communicant will be forwarded to the Dutch Government for comments.

Best regards,
Eleonore van Rijssen
