ENERgy Research to Innovation

Reinforcing cooperation with Eastern Partnership (EaP) countries on bridging the gap between energy research and energy innovation

<http://www.ener2i.eu/>

ener2i – basic facts

- **Project Coordinator** – Centre for Social Innovation (ZSI), Vienna, Austria
- **Duration** – 36 Months, October 2013-September 2016
- **EaP target countries** – Armenia, Belarus, Georgia, Moldova
- **EU partners** – Austria, Hungary, Germany; (and Netherlands, Norway and others through eseia network)
- **Project Budget** – around € 1 million, supported in the EU's 7th Framework Programme for RTD (FP7)

Main project activities

ener2i EE/RES country reports

ener2i Country Reports on the energy sectors in Armenia, Belarus, Georgia and Moldova

19. Nov. 2014

The ener2i project consortium has published four Country Reports on the energy sectors of [Armenia](#), [Belarus](#), [Georgia](#) and [Moldova](#) as well as a pre-final version of a comparative [cross-country report](#). The reports focus on the potential in energy efficiency (EE) and renewable energy sources (RES), and provide an overview of available technologies and technology providers, opportunities and barriers and address relevant policies and energy strategies. This analysis will be a basis for the formulation of policy recommendations and the definition of a joint roadmap on EE/RES at a later stage of the ener2i project.

ener2i Brokerage Event in Moldova

ener2i Workshop on Innovation in Energy Efficiency and Renewable Energy in

Ener2i EU Brokerage Event

Event Calendar

November 2014

MO TU WE TH FR SA SU

ener2i brokerages & workshops

Belarus: 14-15 October 2014, in Minsk linked to Energy Expo;

Moldova: 10-11 December 2014, in Chisinau, linked to Top Innovation event

Georgia: 1-2 June 2015, in Tbilisi in cooperation with SECURE R2I and INNOVER-EAST projects;

Armenia: 2nd October 2015, in Yerevan, linked to 6th International Renewable and Clean Energy Conference

ener ²i

ener2i Twinning

- **Ener2i Twinning Activities**
3 day study visits & 5 day staff exchanges
- **EU-EaP 3 day study visits:**
e.g. 2 German experts of Energy Agency North-Rhine Westphalia to Armenia in June 2014
- **EaP-EU 3 day study visits/5 day staff exchanges:**
9 experts from Armenia, Belarus, Georgia and Moldova for a 3 day study visit to Vienna & Graz, Austria in May 2015

Innovation Vouchers

- **Innovation Vouchers – Belarus**
competition between May-August 2014
8 applications / 4 Vouchers awarded
- **Innovation Vouchers – Moldova**
competition between December 2014 - March 2015
34 applications / 11 Vouchers awarded (CEI co-funded)
- **Innovation Vouchers – Georgia**
competition between March – May 2015
18 applications / 6 Vouchers awarded
- **Innovation Vouchers – Armenia**
competition between May 2015 - July 2015
14 applications / 6 Vouchers awarded

ener2i Innovation Vouchers

- **Innovation Voucher Competition (IVC)**

Bring businesses and research organisations in direct contact; per Voucher € 4,000 awarded

- **Example:**

Moldova: Testing to help optimize the design and efficiency of new glazed solar air heating collectors

Energy Solaris SRL is a Moldovan start-up developing innovative **solar thermal products** in the emerging solar air field, which has great potential for increasing the energy efficiency of buildings.

Research partner: TestLab Solar Thermal Systems, Fraunhofer Institute for Solar Energy Systems, Germany

Funded projects

For each funded project of the ener2i Innovation Voucher competition a one-page description of the project, its main objectives and the involved partners can be found here to give an overview of the funded projects.

Moldova

- IV_MD_2015_47 New material in construction - Termo-Fono-Izolant
- IV_MD_2015_49 Energy Integrated System for small Moldovan enterprises in the agricultural sector
- IV_MD_2015_51 Improving the energy efficiency of equipment for biomass processing by briquetting
- IV_MD_2015_57 Building prototype of energy saving turbine system
- IV_MD_2015_61 The Flow of Life
- IV_MD_2015_62 Short-term wind speed forecasting technique for selected localities in Moldova
- IV_MD_2015_66 Polymers for energy efficiency improvement
- IV_MD_2015_68 Innovative solutions for energy efficiency consumption in public lighting systems
- IV_MD_2015_70 National Energy Monitoring System for Public Institutions
- IV_MD_2015_75 Testing to help optimize design and efficiency of new glazed solar air heating collectors
