THE BOREAL FOREST OR 'TAIGA'
extends across the UNECE Region
greater in extent than the Amazon rain forest

A world map with a light blue background. Landmasses are shown in a light tan color. Boreal forests, or taiga, are highlighted in green. These green areas are concentrated in the Northern Hemisphere, specifically in North America (Canada and Alaska), Europe (Russia and Scandinavia), and Northern Asia (Russia). Two horizontal dashed red lines are drawn across the map, representing the Arctic and Tropic of Cancer. At the bottom of the map, there is a scale bar with markings for 0, 200, 400, and 600 kilometers.
