

Regional Advisor - Environment

Ms. Sarangoo Radnaaragchaa

Ms. Radnaaragchaa has extensive experience dedicated to improving conditions for environmental and sustainable natural resource management at national, regional and international levels. Before joining UNECE in 2014, she worked as a senior officer with the Ministry of Nature and Environment of Mongolia and continued her career as environmental specialist in various long-term assignments with UNDP, FAO, UNEP, the International Union for Conservation of Nature (IUCN), the German International Cooperation (GIZ) and with consulting companies. She served as an expert member of the IUCN World Heritage Panel on World Heritage. Her particular areas of expertise include: implementation of Multilateral Environmental Agreements (MEA), environmental policy analysis and formulation, participatory natural resource management, environmental and social impact assessment, capacity development, public consultation, conflict management and project implementation and evaluation. She obtained a Bachelor of Arts on Social Sciences from the University of Humanity Studies in Moscow, Russian Federation, and she completed her Postgraduate studies in Environmental Management at the Flinders University, Adelaide, Australia.

Technical Cooperation in environment

UNECE technical cooperation in the area of environment is focused on facilitating subregional, transboundary and cross-sectoral environmental cooperation. All activities aim to improve the capacity of countries with economies in transition to implement the UNECE environmental conventions:

- Convention on Long-range Transboundary Air Pollution
- Convention on Environmental Impact Assessment in a Transboundary Context
- Convention on the Protection and Use of Transboundary Watercourses and International Lakes
- Convention on the Transboundary Effects of Industrial Accidents
- Convention on Access to Information, Public Participation in Decision-making and Access to Justice in Environmental Matters

Another important objective is to enhance synergies between the five UNECE environmental conventions.
