

## Regional Advisor – Transport

### **Mr. Nenad Nikolic**

For much of his career, Mr. Nikolic work has focused on the development of efficient multimodal regional transport networks, transport connectivity and the improvement of road safety. As a regional advisor, he is providing a broad range of capacity development services to the member States on sustainable transport, road safety and connectivity. He is involved in regional infrastructure development projects (TEM, TER), regional sustainable transport and connectivity cooperation in Central Asia (SPECA) and road safety development projects. Prior to joining UNECE in 2014, Mr. Nikolic was General Manager and Transport Planning Manager at the South-East Europe Transport Observatory (SEETO), and Head of Unit at the Ministry of Transport of the Republic of Serbia. He graduated from the Transport and Traffic Engineering Faculty and is now finalizing his PhD studies in Road Safety at the University of Belgrade. Mr. Nikolic has published more than 40 papers in various areas of transport planning, road safety and intelligent transport systems.

### **Technical cooperation in transport**

UNECE technical cooperation in the field of transport aims to improve national capacity of member States to accede to and efficiently implement UN transport-related legal instruments and regulations as well as in promoting cooperation among countries in planning and developing coherent road, rail, inland waterway and combined transport infrastructure. UNECE technical cooperation services are focused on:

- providing advisory services, strategic guidance and administrative backstopping of technical cooperation projects for countries with economies in transition to develop coherent pan-European transport networks and corridors and improve connectivity on Euro-Asian transport links;
- capacity-development projects, workshops, and training to assist countries to accede to and efficiently implement UN transport-related legal instruments and regulations;
- transferring know-how and sharing best practices on transport connectivity and road safety; and
- providing support to sub-regional transport initiatives and projects.
