Regional Advisor - Sustainable Energy

Mr. Oleg Dzioubinski

Mr. Oleg Dzioubinski joined UNECE in 2003 and was appointed as a Regional Advisor on sustainable energy in 2018. He has extensive experience in energy efficiency in industry sector and buildings as well as regulatory and policy environment to improve energy efficiency. He provides advisory services, capacity-building activities and implements field projects in the area of sustainable energy upon requests of the countries with economies in transition in the UNECE region. Prior to joining the Sustainable Energy Division, Mr. Dzioubinski was working in the Environment Division, where he was a member of the team undertaking Environmental Performance Reviews (EPRs) of the countries of South-Eastern and Eastern Europe, the Caucasus and Central Asia. His previous experience with the United Nations includes working at the Department of Economic and Social Affairs (DESA) on sustainable development, and at the Department of Public Information on cooperation with NGOs. Mr. Dzioubinski holds Master's degree in Mechanical Engineering from the National University of Shipbuilding, Ukraine and Master's degree in Diplomacy and International Commerce from the University of Kentucky, United States.

Technical cooperation in sustainable energy

UNECE technical cooperation in the field of energy aim at providing advisory services and technical assistance to countries with economies in transition and complement and reinforce the regular and extrabudgetary programmes in energy. The activities are tailored to the demand of the recipient countries and include a combination of the following:

- preparation of project proposals for funding by international organizations and donor countries;
- development and preparation of studies related to energy strategies and policies in beneficiary countries;
- assistance in transition of national economies and energy markets towards more sustainable energy production and use by increasing the market share of renewable energy in the current energy mix and improving energy efficiency in industry and buildings sectors;
- participation in development and implementation of programmes for capacity and institutional building and training, including organization of workshops, seminars and consultative and advisory missions; and
- organization of study tours.
